
PRODUCT CHANGE NOTICE

**Alternate Manufacturing Site
for Assembly of the Listed
Intersil SOIC Packaged
Products**

**Refer to:
PCN12085B**

Date: February 05, 2014

February 05, 2014

To: Our Valued Intersil Customer

Subject: **Alternate Manufacturing Site for Assembly of the Listed Intersil SOIC Packaged Products – Amkor Technology, Philippines (ATP)**

PCN12085B is being issued to inform customers that Intersil has updated the list of affected products contained in notice PCN12085 that was issued on November 07,2012. The products listed in the table below have been removed from the notice. As such, the changes outlined in PCN12085 will not be implemented for those products. The content of the original notice, PCN12085, with the updated product list and completed qualification activity is included for reference.

Products removed from PCN12085:

This notice is to inform you that Intersil will begin using Amkor Technology (ATP) facility in the Philippines as an alternate site for assembly of the listed SOIC (Small Outline Integrated Circuit) packaged products. This action will expand current capabilities and capacities to optimize Intersil's ability to meet customer's delivery requirements. The product and site-specific qualification activities are in progress and expected to complete during Q1 CY2013.

The Amkor Technology (ATP) facility is ISO 9001:2008, TS 16949:2009, and ISO 14001:2004 certified. The ATP facility is qualified as a supplier to Intersil for performing assembly of packaged products, including the SOIC package style. There will be no change in the lead frame material, package outline drawing (POD), mold compound, bond wire (material or diameter), or moisture sensitivity level (MSL). The material set combinations for assembly and other key items are as follows:

Key Items	ANST/CAM/UTAC/UNM Current	ATP New (Alternate)
Mold Compound	Sumitomo EME-G600 and E670CB	Sumitomo EME-G600 and E670CB
Die Attach	8290,84-1LMISR4**, A2200D, A8200T	8290, 84-1LMISR8**, A2200D, A8200T
Bond Wire	1.0, 1.2, or 1.3 mil	1.0, 1.2, or 1.3 mil
Moisture Sensitivity Level	1, 2, or 3	1, 2, or 3
Device Marking - Site Code	V, G, S, or B	L

**Products using 84-1MILSR4 will transition to 84-1LMISR8 at ATP

The assembly qualification plan is designed using JEDEC and other applicable industry standards to confirm there is no impact to form, fit, function, or interchangeability of the product. A summary of the qualification plan is included for reference. The qualification results will be available for review upon completion by request. The remainder of the manufacturing operations (wafer fabrication, package level electrical testing, shipment, etc.) will continue to be processed to previously established conditions and systems.

Product affected by this change is identifiable via Intersil's internal traceability system. In addition, product assembled at ATP may also be identified by the assembly site code (country of assembly) when marked on the devices. The site code for product assembled at ATP with gold bond wire is "L".

Intersil will take all necessary actions to conform to agreed upon customer requirements and to ensure the continued high quality and reliability of Intersil products being supplied. Customers may expect to receive product assembled at either the current or the newly qualified sites beginning *ninety* days from the date of the original notice, November 07, 2012 or earlier with approval.

If you have concerns with this change notice, Intersil must hear from you promptly. Please contact the nearest Intersil Sales Office or call the Intersil Corporate line at 1-888-468-3774, in the United States, or 1-321-724-7143 outside of the United States.

Regards,

Jeff Touvell
Intersil Corporation
