

RE Partner Solution KELK Micro TEG Module

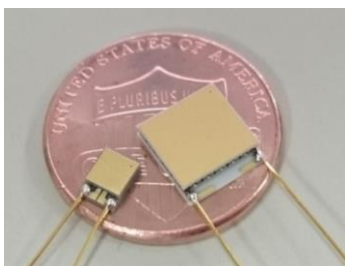

Solution Summary

Micro TEG (Thermoelectric Generator) Modules are high performance and high reliability module which made with high density element mount technology for KELK optical communication.

Features/Benefits

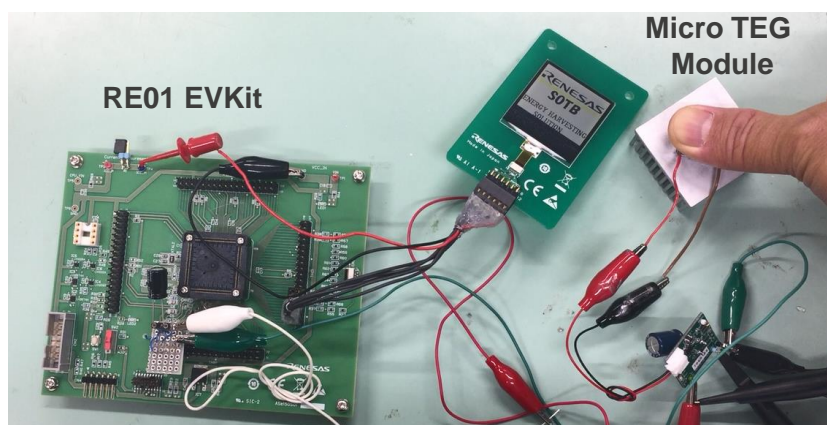

- High performance / high quality thermoelectric power generation module
- Optimization for energy harvesting

Graphics

Micro TEG module

KELK Micro TEG module (KELGEN) and [RE01 Evaluation Kit](#) demonstrates LCD display for continuous operation of RE embedded controller with environmental temperature difference.

Target Markets and Applications

- Industrial Sensor Devices
- IoT products

KELGEN

KELK Thermoelectric Generation
