1.2 Overview of the Three Months Ended September 30, 2008

The global economic situation deteriorated during the three months ended September 30, 2008. As a financial crisis spread from the United States to the rest of the world, asset prices fell and employment rates adjusted, and a decline in consumer confidence led businesses to reduce inventories and curb capital expenditures, hastening a global economic downturn.

In the US economy, consumer spending and capital expenditures fell due to adjustments in the housing market and lingering turmoil in the financial markets. In Europe as well, consumer spending has been flat due to rising commodity prices. In Asia, reductions in exports and stagnant demand due to high prices have slowed growth.

The immediate impact of the financial crisis was not felt as strongly in Japan as in other countries because of its similar experience in the 1990's. Nevertheless, global increases in materials prices, falling stock and asset prices, as well as a downturn in the global economy overall led to a clear slowdown in the Japanese economy as well.

Amidst this global economic downturn, the semiconductor market in which NEC Electronics operates grew increasingly severe, as customers reduced inventories and orders. Sales of computers and automobiles in the European and North American markets declined, and sales of mobile phones and digital consumer electronics, which had been buoyed by demand in emerging economies, were gradually affected.

2. Financial Condition

2.1 Total Assets and Shareholders' Equity

	March 31, 2008	September 30, 2008		Increase (Decrease)
	Billion Yen	Billion Yen	Million USD	Billion Yen

Total assets at September 30, 2008 totaled 622.0 billion yen, a 5.7 billion yen increase from March 31, 2008, mainly due to an increase in inventories.

Compared to March 31, 2008, shareholders' equity was 2.3 billion yen lower at 224.8 billion yen, due to net loss in the amount of 1.9 billion yen for the period from April to September 2008.

The shareholders' equity ratio decreased by 0.8 points from March 31, 2008 as a result of a decrease in shareholders' equity.

Interest-bearing debt totaled 117.1 billion yen, increasing 0.5 billion yen from March 31, 2008 mainly due to lease obligations.

2.2 Cash Flows

Three Months Ended September 30, 2008

Cash and cash equivalents at end of period	191.4	158.0	1,491	(33.3)

Despite recording a net loss and an increase in inventories, depreciation and amortization in the amount of 17.0 billion yen led to net cash provided by operating activities in the amount of 14.6 billion yen for the quarter ended September 30, 2008.

Payments for property, plant, and equipment in the amount of 11.7 billion yen brought the total net cash used in investing activities to 12.5 billion yen.

The foregoing resulted in positive free cash flows of 2.1 billion yen.

Financing activities used net cash in the amount of 0.8 billion yen for the repayment of debt.

As a result of the above, combined with the negative impact of currency exchange fluctuations in the amount of 2.3 billion yen, the net decrease in cash and cash equivalents was 1.0 billion yen, resulting in cash and cash equivalents at September 30, 2008 totaling 158.0 billion yen.

For more information on cash flows for the three months ended June 30, 2008, please refer to the first quarter financial results announced on July 30, 2008.

3. Consolidated Forecasts

During the six months ended September 30, 2008, the subprime mortgage issue generated a financial crisis that spread from the United States to the rest of the world, asset prices fell, employment rates adjusted, and a decline in consumer confidence led businesses to reduce inventories and curb capital expenditures, hastening a global economic downturn.

From the end of September, as financial institutions failed one by one in North America and Europe, there was a crisis in confidence in the broader financial system. As evidenced by the drop in stock prices around the world, and the stronger yen caused by the influx of foreign funds toward a safe haven currency, the global economy became increasingly unstable.

Amidst this global economic downturn, the semiconductor market in which NEC Electronics operates grew increasingly severe as customers reduced inventories and orders. Sales of computers and automobiles in the European and North American markets declined, and sales of mobile phones and digital consumer electronics, which had been buoyed by demand in emerging economies, were gradually affected by the downturn. The second half of the fiscal year (October 2008 to March 2009) is likely to become increasingly severe.

In this environment, NEC Electronics announced the following revisions to its full-year forecasts on October 21, 2008: consolidated net sales are expected to be 660.0 billion yen, 25.0 billion yen less than the initial forecast; semiconductor sales are expected to be 630.0 billion yen, 20.0 billion yen less than the original forecast; consolidated operating income is expected to be 1.0 billion yen, 9.0 billion yen less than the initial forecast; consolidated loss before income taxes is expected to be 4.0 billion yen, 8.0 billion yen less than the initial forecast; and consolidated net loss is expected to be 8.0 billion yen, 8.0 billion yen less than the initial forecast.

The main factor leading to the forecast revisions was the expectation that semiconductor sales would fall far below initial estimates as market conditions deteriorate with the global economic downturn. Sales of automotive semiconductors and general purpose products such as microcontrollers and discrete devices, are expected to be particularly hard hit.

Although NEC Electronics still expects to post an operating profit, the large decline in net sales will significantly reduce profits, and the net income which the company originally forecast has been revised to an 8.0 billion yen net loss.

Although the abrupt decline of the business environment has made it difficult to achieve a net income for the year, the company is dedicated to improving its financial results through the continuous reduction of fixed costs and improvements in management efficiency, as well as by accelerating the reorganization of manufacturing lines, and strengthening its focus on competitive products.

	Net Sales	Sales from semiconductors	Operating Income (Loss)	Income (Loss) Before Income Taxes	Net Income (Loss)
	Million Yen	Million Yen	Million Yen	Million Yen	Million Yen
Initial forecasts (May 14, 2008)	685,000	650,000	10,000	4,000	0
Forecasts as of October 21, 2008	660,000	630,000	1,000	(4,000)	(8,000)
Increase (decrease)	(25,000)	(20,000)	(9,000)	(8,000)	(8,000)
Percent change	(3.6)%	(3.1)%	(90.0)%		

The consolidated financial forecasts for the fiscal year are calculated at the rate of 105 yen per USD (revised from the rate of 100 yen per USD in the initial forecast), and 145 yen per Euro (revised from the rate of 160 yen per Euro in the initial forecast).
