RENESAS Tool News

Flash Development Toolkit
Revised to V.3.07 Release 05

We have revised Flash Development Toolkit V.3.07 Release 04 to V.3.07 Release 05. This product is used to program the flash ROMs of MCUs in the SuperH RISC engine, M16C, H8SX, H8S, H8, R8C, and 740 families.

1. Description of Revision

The following problem has been resolved:

If you write programs several times to the flash memory on any of the MCUs concerned without exiting Flash Development Toolkit, it gradually takes longer time to write programs.

For details of the problem, see RENESAS TOOL NEWS Document No. 091001/tn11, published on October 1, 2009, at:
  http://tool-support.renesas.com/eng/toolnews/091001/tn11.htm

2. How to Update Your Product

If you are using Flash Development Toolkit V.3, online update is available free of charge.
To update yours, download the update program of the product from:
  http://www.renesas.com/fdt_download
Then execute it. This Web site will be opened from December 21.
