Old Company Name in Catalogs and Other Documents

On April 1st, 2010, NEC Electronics Corporation merged with Renesas Technology Corporation, and Renesas Electronics Corporation took over all the business of both companies. Therefore, although the old company name remains in this document, it is a valid Renesas Electronics document. We appreciate your understanding.

Mask ROM number

740 FAMILY MASK ROM CONFIRMATION FORM SINGLE-CHIP MICROCOMPUTER M38514M6-XXXSP/FP RENESAS TECHNOLOGY

	i	
	Date:	
Receipt	Section head signature	Supervisor signature

Note : Please fill in all items marked *

					TNOLC		items markeu **.
*	Customer	Company name		TEL ()	uance nature	Submitted by	Supervisor
		Date issued	Date:		Issu sigr	sign	

* 1. Confirmation

Specify the name of the product being ordered.

Three EPROMs are required for each pattern if this order is performed by EPROMs.

One floppy disk is required for each pattern if this order is performed by a floppy disk.

Microcomputer name:

M38514M6-XXXSP

M38514M6-XXXFP

Ordering by EPROMs

Specify the type of EPROMs submitted.

If at least two of the three sets of EPROMs submitted contain identical data, we will produce masks based on this data. We shall assume the responsibility for errors only if the mask ROM data on the products we produce differs from this data. Thus, extreme care must be taken to verify the data in the submitted EPROMs.

Checksum code for entire EPROM

(hexadecimal notation)

EPROM type (indicate the type used)

	27256	□ 27512
EPROM ac	ldress	EPROM address
000016	Product name ASCII code :	000016 Product name ASCII code :
000F16	'M38514M6-'	000F16 ^{(M38514M6-'}
001016		001016
207F16		A07F16
208016	data	A08016 data
7FFD16 7FFE16 7FFF16	ROM (24K-130) bytes	FFFD16 FFFE16 FFFE16
,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	V / / / / / / / / / / / / / / / / / / /	

(1) Set the data in the unused area (the shaded area of the diagram) to "FF16".

(2) The ASCII codes of the product name "M38514M6-" must be entered in addresses 000016 to 000816. And set the data "FF16" in addresses 000916 to 000F16. The ASCII codes and addresses are listed to the right in hexadecimal notation. In the address space of the microcomputer, the internal ROM area is from address A08016 to FFFD16. The reset vector is stored in addresses FFFC16 and FFFD16.

Address		Address	
000016	'M' = 4D16	000816	'—' = 2D16
000116	'3' = 3316	000916	FF16
000216	'8' = 38 16	000A16	FF16
000316	'5' = 3516	000B16	FF16
000416	'1' = 3116	000C16	FF16
000516	'4' = 3416	000D16	FF16
000616	'M' = 4D16	000E16	FF16
000716	'6' = 3616	000F16	FF16

Mask ROM number

740 FAMILY MASK ROM CONFIRMATION FORM SINGLE-CHIP MICROCOMPUTER M38514M6-XXXSP/FP **RENESAS TECHNOLOGY**

We recommend the use of the following pseudo-command to set the start address of the assembler source program because ASCII codes of the product name are written to addresses 000016 to 000816 of EPROM.

EPROM type	27256	27512		
The pseudo-command	*= △\$8000 .BYTE △'M38514M6–'	*= △\$0000 .BYTE △'M38514M6–'		

Note : If the name of the product written to the EPROMs does not match the name of the mask confirmation form, the ROM will not be processed.

Ordering by floppy disk

We will produce masks based on the mask files generated by the mask file generating utility. We shall assume the responsibility for errors only if the mask ROM data on the products we produce differs from this mask file. Thus, extreme care must be taken to verify the mask file in the submitted floppy disk.

The submitted floppy disk must be 3.5-inch 2HD type and DOS/V format. And the number of the mask files must be 1 in one floppy disk.

File code					(hexadecimal notation)
Mask file name					.MSK (equal or less than eight characters)

* 2. Mark specification

Mark specification must be submitted using the correct form for the package being ordered. Fill out the appropriate mark specification form (42P4B for M38514M6-XXXSP, 42P2R for M38514M6-XXXFP) and attach it to the mask ROM confirmation form.

* 3. Usage conditions

Please answer the following questions	about usage for use in our product inspection :
(1) How will you use the XIN-XOUT oscillator Ceramic resonator External clock input	·? □ Quartz crystal □ Other ()
At what frequency?	f(XIN) = MHz
(2) Which function will you use the pins P2	1/XCIN and P20/XCOUT as P21 and P20, or XCIN and XCOUT ?
(3) Will you use the I ² C-BUS function or the	SM-BUS function ?
 I²C-BUS function used Not used 	□ SM-BUS function used
* 4. Comments
