[Upgrade to revision]

Renesas Flash Programmer V3.03.01,

CS+ Integrated Development Environment

## Outline

We are revising the Renesas Flash Programmer, a software tool for programming flash memory, and will change its current version number from V3.03.00 to V3.03.01 accordingly. Also, we will be revising USB Driver for USB Boot MCU TypeB included in the CS+ integrated development environment from V1.00.00 to V1.01.00.

For an overview of Renesas Flash Programmer, see the following URL.
https://www.renesas.com/rfp

## 1. Description of Revision

### 1.1 Description of Modification

The problems regarding the points below will be fixed.

(1) An Error Occurring during Installation of the USB Driver for USB Boot MCU TypeB

For more information on the problem, see RENESAS TOOL NEWS, document No. R20TS0223EJ0100 at the URL below.

https://www.renesas.com/search/keyword-search.html#genre=document&q=r20ts0223

(2) A Connection Error Occurring when Using the Renesas Flash Programmer with the E2 Emulator

For more information on the problem, see RENESAS TOOL NEWS, document No. R20TS0223EJ0100 at the URL below.

https://www.renesas.com/search/keyword-search.html#genre=document&q=r20ts0223

## 2. Updating Your Product

Online updating of Renesas Flash Programmer and USB Driver for USB Boot MCU TypeB for the CS+ integrated development environment is possible. Download the installer from the URL below to install the program.
The installer will be available from November 6.

(1) Renesas Flash Programmer
