* 1. Check sheet

Renesas processes the mask files generated by the mask file generation utilities out of those held on the floppy disks you give in to us, and forms them into masks. Hence, we assume liability provided that there is any discrepancy between the contents of these mask files and the ROM data to be burned into products we produce. Check thoroughly the contents of the mask files you give in.

Prepare 3.5inches 2HD(IBM format) floppy disks. And store only one mask fill in a floppy disk.

Microcomputer type No.: M30263M3A-XXXFP

File code: (hex)
