PRODUCT/PROCESS CHANGE NOTICE (PCN)

ATTACHMENT 1 - PCN # : A1409-01

PCN Type: Assembly Material Change - Gold Wire to Copper Wire

Data Sheet Change: None

Details Of Change:

This notification is to advise our customers that IDT will change from Gold bond wire to Copper bond wire.

There is no change to the moisture performance of this package.

Customers may expect to receive shipments with Copper wire process no sooner than 30 days from the date of this notification. Product assembled with Gold wire and Copper wire will be shipped during the transition period or until the Gold wire inventory has been depleted. However please note that product assembled with Gold wire and Copper wire will not be mixed in one tray stack, or tape and reel.

We request you to acknowledge receipt of this PCN notification. If you require samples to conduct an evaluation, please make your sample request through your local IDT sales representative.

Assembly Material: There is no change in the mold compound and die attach materials. The material

sets used in assembly is in compliance with RoHS 6 (green products) requirement. There is no change in the moisture sensitivity performance.

Samples are available now. Please contact your local IDT sales representative

Sample Availability: for your sample request.

Note:

2. Product Electrical Characterization

Product electrical characterization has been successfully completed and copper wire performance was comparable to gold wire performance.

^{*} Test requires moisture pre-conditioning sequence per JESD22-A113 and will use the existing moisture sensitivity level that has been qualified for this material set.
