

To our customers,

Old Company Name in Catalogs and Other Documents

On April 1st, 2010, NEC Electronics Corporation merged with Renesas Technology Corporation, and Renesas Electronics Corporation took over all the business of both companies. Therefore, although the old company name remains in this document, it is a valid Renesas Electronics document. We appreciate your understanding.

Renesas Electronics website: <http://www.renesas.com>

Send any inquiries to <http://www.renesas.com/inquiry>.

Notice

1. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
7. Renesas Electronics products are classified according to the following three quality grades: “Standard”, “High Quality”, and “Specific”. The recommended applications for each Renesas Electronics product depends on the product’s quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as “Specific” without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as “Specific” or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is “Standard” unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.
 - “Standard”: Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.
 - “High Quality”: Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.
 - “Specific”: Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.

(Note 1) “Renesas Electronics” as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.

(Note 2) “Renesas Electronics product(s)” means any product developed or manufactured by or for Renesas Electronics.

M16C/64 Group

Timer B (Pulse Width Measurement Mode)

1. Abstract

In pulse period measurement mode/pulse width measurement mode, any desired function can be selected from those listed in Table 1. This application note describes the operation of the function selected (marked with a circle) from the items in Table 1.

Table 1. Contents of Settings

Set item	Content of setting	
Count source	○	Internal count source (f1TIMAB or f2TIMAB ^{Note 1} /f8TIMAB /f32TIMAB /f64TIMAB/ fOCO-S/ fC32)
Measurement mode		Pulse period measurement (between a falling edge to the next falling edge of measurement pulse)
		Pulse period measurement (between a rising edge to the next rising edge of measurement pulse)
	○	Pulse width measurement (between a falling edge to the next rising edge of measurement pulse and between a rising edge to the next falling edge)

Note 1: Use the PCLKR register's PCLK0 bit to select.

2. Introduction

The application example presented in this document applies to the microcomputers listed below.

- Microcomputers: M16C/64 group

This application note can be used with other M16C Family MCUs which have the same special function registers (SFRs) as the above group. Check the manual for any modifications to functions. Careful evaluation is recommended before using the program described in this application note.

3. Operation

- (1) When the TBiS bit ($i = 0-5$) of the TABSR or TBSR register is set to 1, the counter starts counting the count source clock cycles. Note 1
- (2) When an active edge of the measurement pulse is input, the counter value is reset to 0000h and a measurement starts. At this time, an indeterminate value is transferred to the reload register. (No timer Bi interrupt requests are generated.)
- (3) When an active edge of the measurement pulse is input again, the counter value is transferred to the reload register and the TBiIC register's IR bit is set to 1 (interrupt requested). After that, the counter recycles to 0000h and a measurement starts over again.

Note 1: The counter operation in pulse width measurement mode is up-count.

In this sample program, as a countermeasure in case an active pulse edge is input at the same time the counter overflows, the measurement pin state is checked in an interrupt handler and if inverted, the measurement result is read out.

Supplementary explanation

- The IR bit of the TBiIC register ($i = 0-5$) is set to 1 when an active edge of the measurement pulse is input or the counter of timer Bi overflows. The cause of interrupt can be identified by the MR3 bit of the TBiMR register.
- The counter value after reset is indeterminate. Write the initial value (0000h) to the TBi register before the timer starts counting.

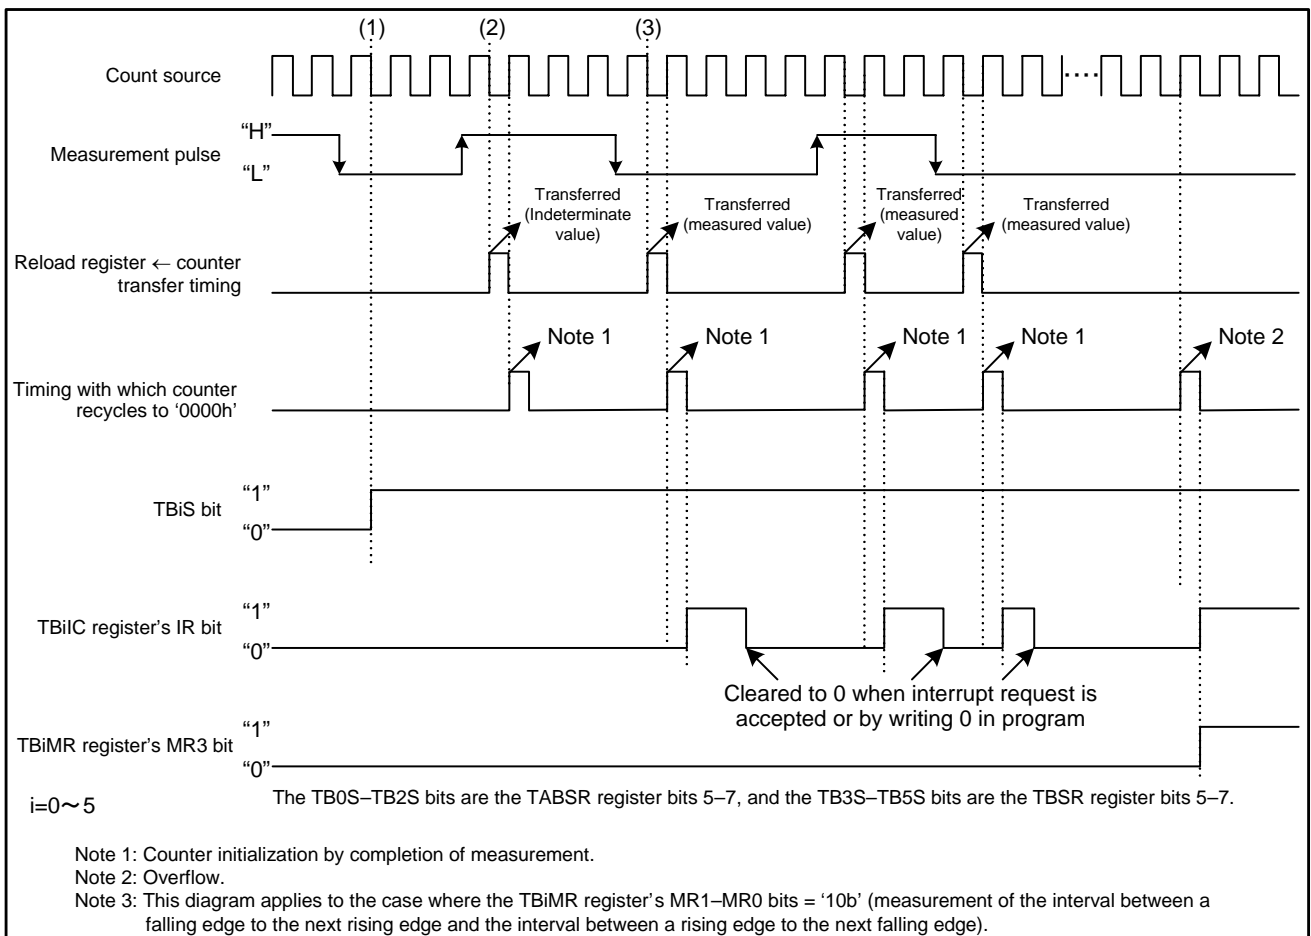

Figure 1. Operation Diagram during Pulse Width Measurement

Table 2 shows how to set the timer B count source.

Table 2. TBi Timer Count Source Settings

TBCS _j register				TBiMR register		PCLKR register	TBi count source
TCS3	TCS2	TCS1	TCS0	TCK1	TCK0	PCLK0 <small>Note 1</small>	
TCS7	TCS6	TCS5	TCS4				
"0"	—	—	—	"0"	"0"	"1"	f1TIMAB
"0"	—	—	—	"0"	"0"	"0"	f2TIMAB
"0"	—	—	—	"0"	"1"	—	f8TIMAB
"0"	—	—	—	"1"	"0"	—	f32TIMAB
"0"	—	—	—	"1"	"1"	—	fC32
"1"	"0"	"0"	"0"	—	—	"1"	f1TIMAB
"1"	"0"	"0"	"0"	—	—	"0"	f2TIMAB
"1"	"0"	"0"	"1"	—	—	—	f8TIMAB
"1"	"0"	"1"	"0"	—	—	—	f32TIMAB
"1"	"0"	"1"	"1"	—	—	—	f64TIMAB
"1"	"1"	"0"	"1"	—	—	—	fOCO-S
"1"	"1"	"1"	"0"	—	—	—	fC32

When selecting the TB0 count source: $i = 0, j = 0$, TCS3–TCS0

When selecting the TB1 count source: $i = 1, j = 0$, TCS7–TCS4

When selecting the TB2 count source: $i = 2, j = 1$, TCS3–TCS0

When selecting the TB3 count source: $i = 3, j = 2$, TCS3–TCS0

When selecting the TB4 count source: $i = 4, j = 2$, TCS7–TCS4

When selecting the TB5 count source: $i = 5, j = 3$, TCS3–TCS0

—: Don't care (can be 0 or 1).

Note 1: Before rewriting this bit, set the PRCR register's PRC0 bit to 1 (write enabled).

4. How to Set Up

The following shows how to set up the registers to accomplish the operation described in Section 3, "Operation." For details about each register, see the hardware manual of the M16C/64 group.

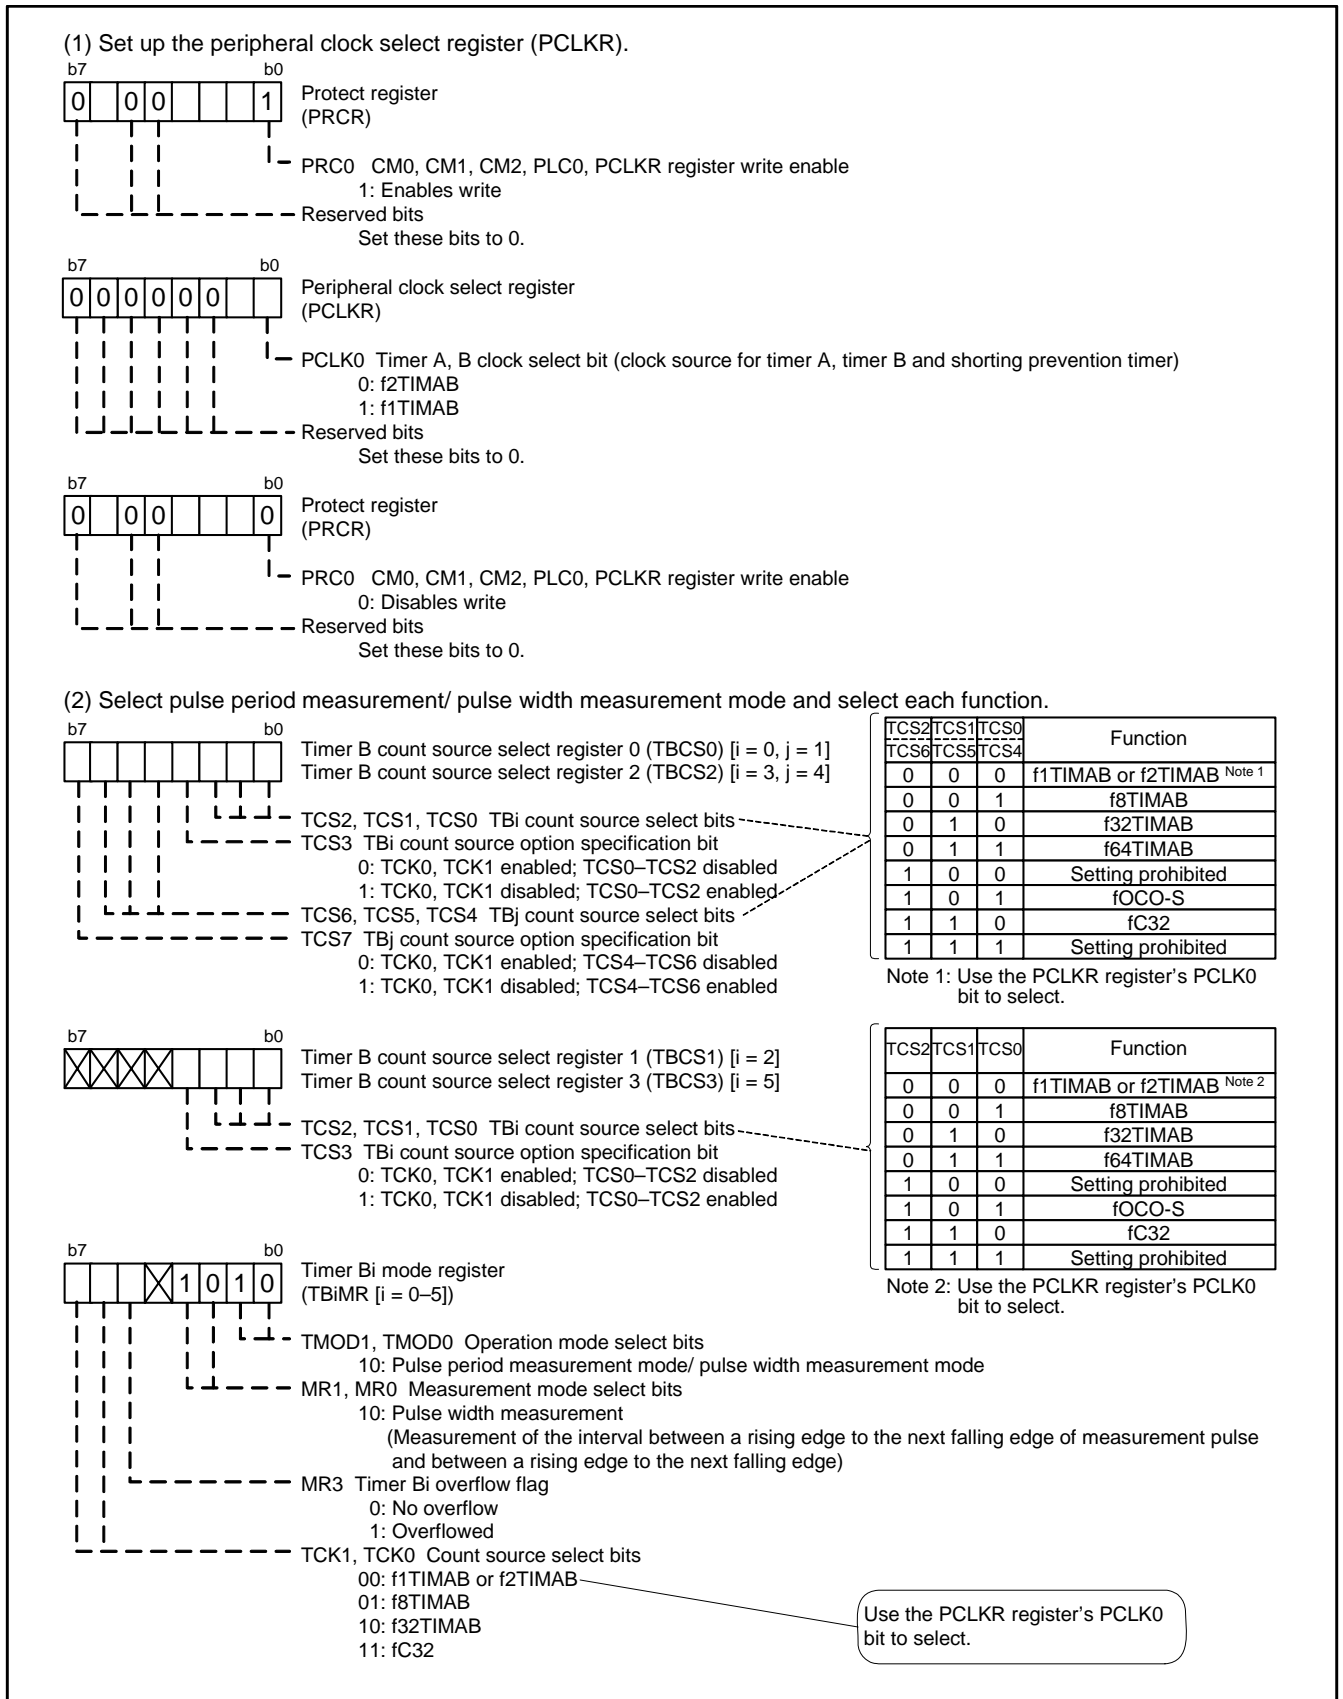

Figure 2. Procedure for Setting Up the Registers to Use a Timer B (Pulse Width Measurement Mode) Application (1)

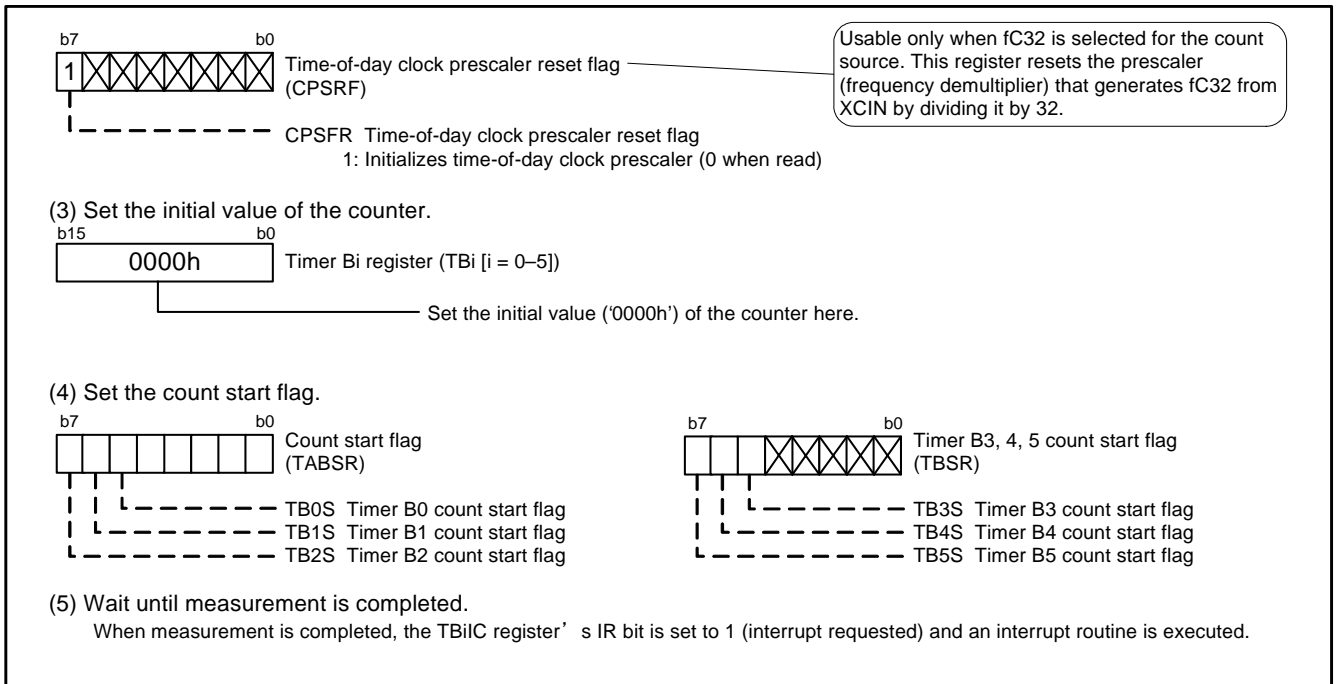

Figure 3. Procedure for Setting Up the Registers to Use a Timer B (Pulse Width Measurement Mode) Application (2)

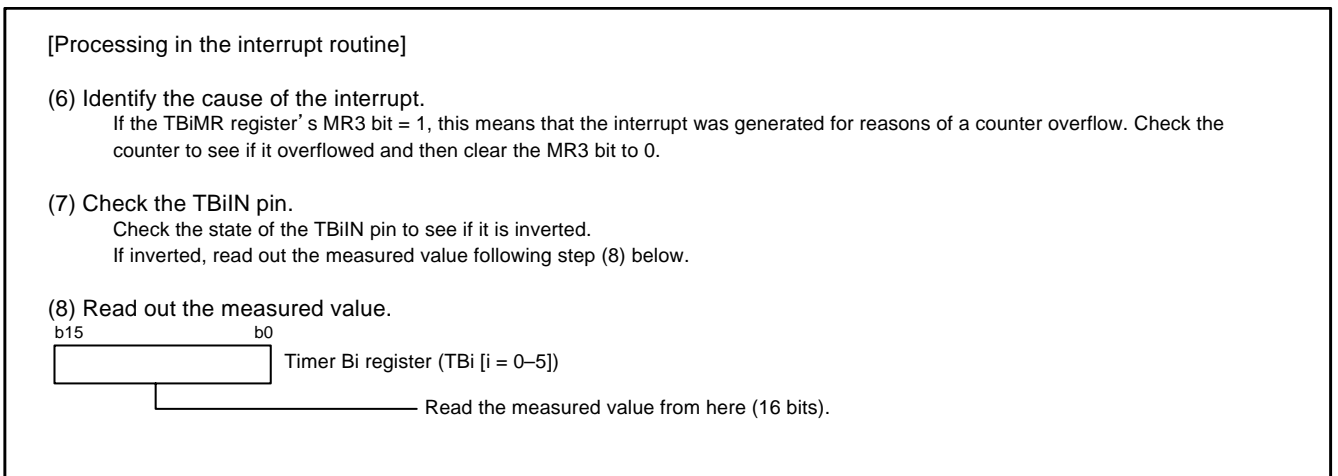

Figure 4. Procedure for Setting Up the Registers to Use a Timer B (Pulse Width Measurement Mode) Application (3)

5. Sample Programs

Download a sample program from the Renesas Technology website. Click the screen menu “Application Note” on the left side of the M16C family’s top web page.

Notes regarding these materials

1. This document is provided for reference purposes only so that Renesas customers may select the appropriate Renesas products for their use. Renesas neither makes warranties or representations with respect to the accuracy or completeness of the information contained in this document nor grants any license to any intellectual property rights or any other rights of Renesas or any third party with respect to the information in this document.
2. Renesas shall have no liability for damages or infringement of any intellectual property or other rights arising out of the use of any information in this document, including, but not limited to, product data, diagrams, charts, programs, algorithms, and application circuit examples.
3. You should not use the products or the technology described in this document for the purpose of military applications such as the development of weapons of mass destruction or for the purpose of any other military use. When exporting the products or technology described herein, you should follow the applicable export control laws and regulations, and procedures required by such laws and regulations.
4. All information included in this document such as product data, diagrams, charts, programs, algorithms, and application circuit examples, is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas products listed in this document, please confirm the latest product information with a Renesas sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas such as that disclosed through our website. (<http://www.renesas.com>)
5. Renesas has used reasonable care in compiling the information included in this document, but Renesas assumes no liability whatsoever for any damages incurred as a result of errors or omissions in the information included in this document.
6. When using or otherwise relying on the information in this document, you should evaluate the information in light of the total system before deciding about the applicability of such information to the intended application. Renesas makes no representations, warranties or guaranties regarding the suitability of its products for any particular application and specifically disclaims any liability arising out of the application and use of the information in this document or Renesas products.
7. With the exception of products specified by Renesas as suitable for automobile applications, Renesas products are not designed, manufactured or tested for applications or otherwise in systems the failure or malfunction of which may cause a direct threat to human life or create a risk of human injury or which require especially high quality and reliability such as safety systems, or equipment or systems for transportation and traffic, healthcare, combustion control, aerospace and aeronautics, nuclear power, or undersea communication transmission. If you are considering the use of our products for such purposes, please contact a Renesas sales office beforehand. Renesas shall have no liability for damages arising out of the uses set forth above.
8. Notwithstanding the preceding paragraph, you should not use Renesas products for the purposes listed below:
 - (1) artificial life support devices or systems
 - (2) surgical implantations
 - (3) healthcare intervention (e.g., excision, administration of medication, etc.)
 - (4) any other purposes that pose a direct threat to human life
 Renesas shall have no liability for damages arising out of the uses set forth in the above and purchasers who elect to use Renesas products in any of the foregoing applications shall indemnify and hold harmless Renesas Technology Corp., its affiliated companies and their officers, directors, and employees against any and all damages arising out of such applications.
9. You should use the products described herein within the range specified by Renesas, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas shall have no liability for malfunctions or damages arising out of the use of Renesas products beyond such specified ranges.
10. Although Renesas endeavors to improve the quality and reliability of its products, IC products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Please be sure to implement safety measures to guard against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other applicable measures. Among others, since the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
11. In case Renesas products listed in this document are detached from the products to which the Renesas products are attached or affixed, the risk of accident such as swallowing by infants and small children is very high. You should implement safety measures so that Renesas products may not be easily detached from your products. Renesas shall have no liability for damages arising out of such detachment.
12. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written approval from Renesas.
13. Please contact a Renesas sales office if you have any questions regarding the information contained in this document, Renesas semiconductor products, or if you have any other inquiries.
