**FY15/3 Q2 Consolidated Forecasts**

# Executive Summary

## I.

### FY15/3 Q1 Financial Results

- Semiconductor sales were 201.2 B yen, an increase by 4.9% QoQ, mainly due to solid sales of automotive and an increase in sales of general-purpose products
- Though the effects of the structural reforms are being materialized as seen with six consecutive quarters of operating income, taking into consideration that income was pushed up by structural reform measures (inventory buildup), then further reforms are required to ensure constant positive results

## II.

### FY15/3 Q2 Consolidated Forecasts

- Semiconductor sales are expected to be 196.8 B yen, a decrease by 2.2% QoQ
- Operating income of 19.0 B yen is expected, despite a decrease of 8.0 B yen QoQ mainly due to a seasonal cost increase at the end of the first half
- Net income of 6.8 B yen is expected, a 14.4 B yen decrease QoQ

# FY15/3 Q1

## Semiconductor Sales by Application Categories (II)

### Automotive

- Despite the seasonal slowdown of automotive production, automotive semiconductor market during the Q1 showed stable growth with solid worldwide sales spurred by strong consumer spending
- Consequently, sales of Automotive Control increased by low single-digit percent and sales of Automotive Information was flat QoQ. Total Automotive semiconductor sales increased by 2%

### General-Purpose

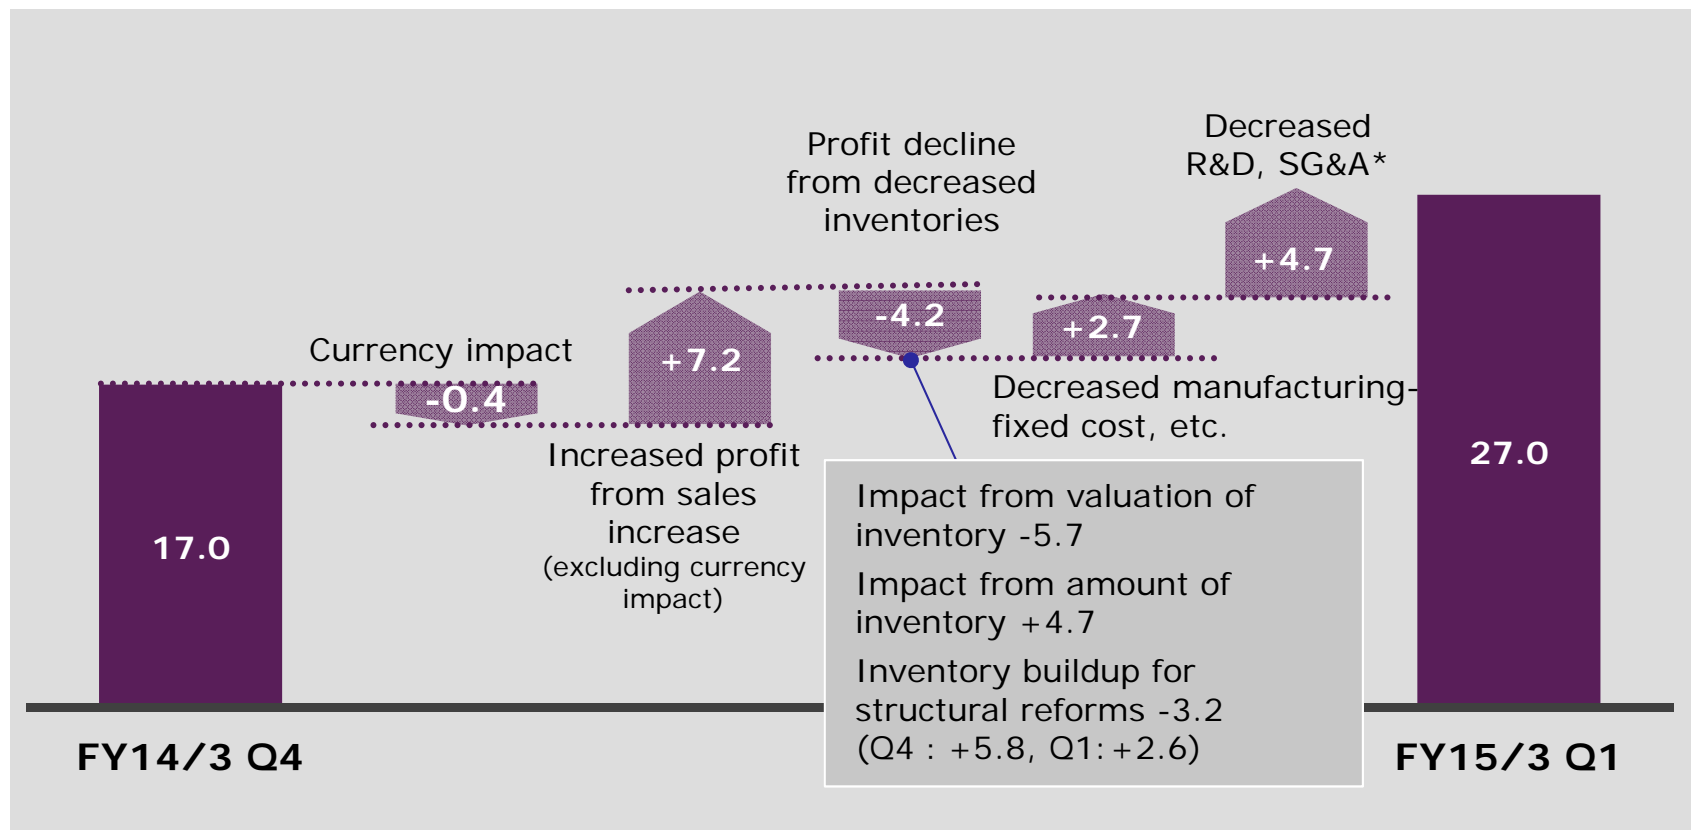

- Spurred by the continuous recovery of the worldwide economy, capital investments and component procurement from semiconductor customers increased and consumer spending was also solid
- Consequently, demands for Other General-Purpose products expanded and sales increased by over 5% QoQ
- Among the Other General-Purpose products, sales of display driver IC in particular increased significantly by approx. 30%
- Industrial/HE increased by middle single-digit percent and OA/ICT increased by approx. 10% QoQ
- Total General-Purpose sales increased by 7%

# FY15/3

## Q1 Operating Income (Loss) QoQ (B yen)

- Despite the inventory buildup for structural reforms that pushed up the income, inventories decreased in total QoQ and led to profit decline
- On the other hand, operating profit increased by 10.0 B yen, mainly due to profit growth from increased sales and rebound of the seasonal cost increase at the year end

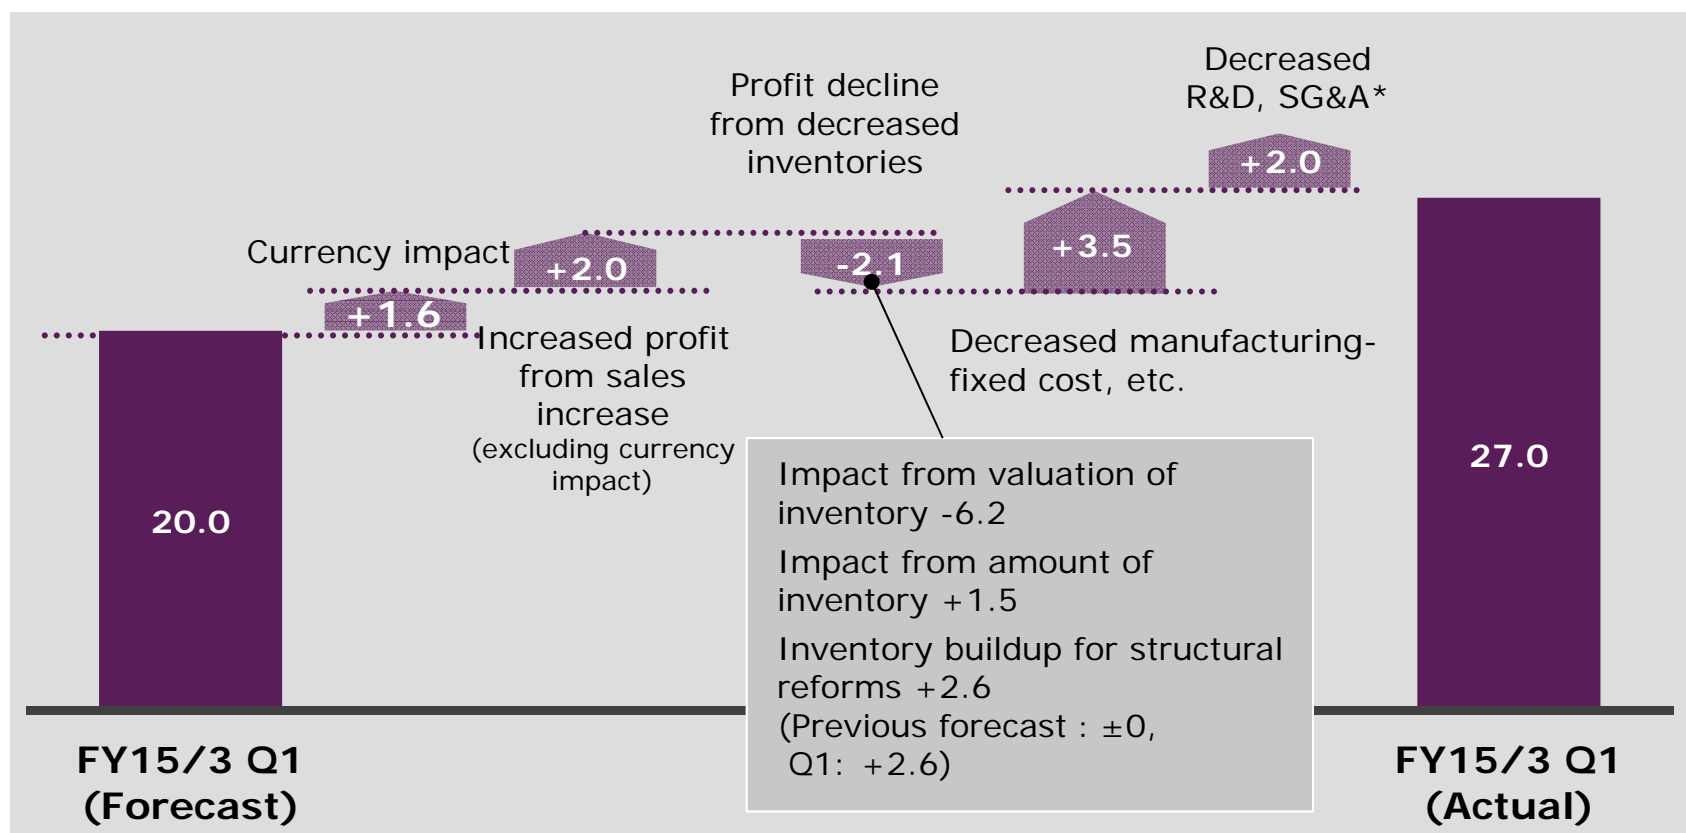

\*R&D: Research and Development, SG&A: Selling, general and administrative expenses

# FY15/3 Q1

## Operating Income (Loss) in Comparison with Forecasts (May 9, 2014) (B yen)

- Operating income improved by 7.0 B yen from the previous forecast, mainly due to price improvement and cost containment effects by pursuing profit improvement

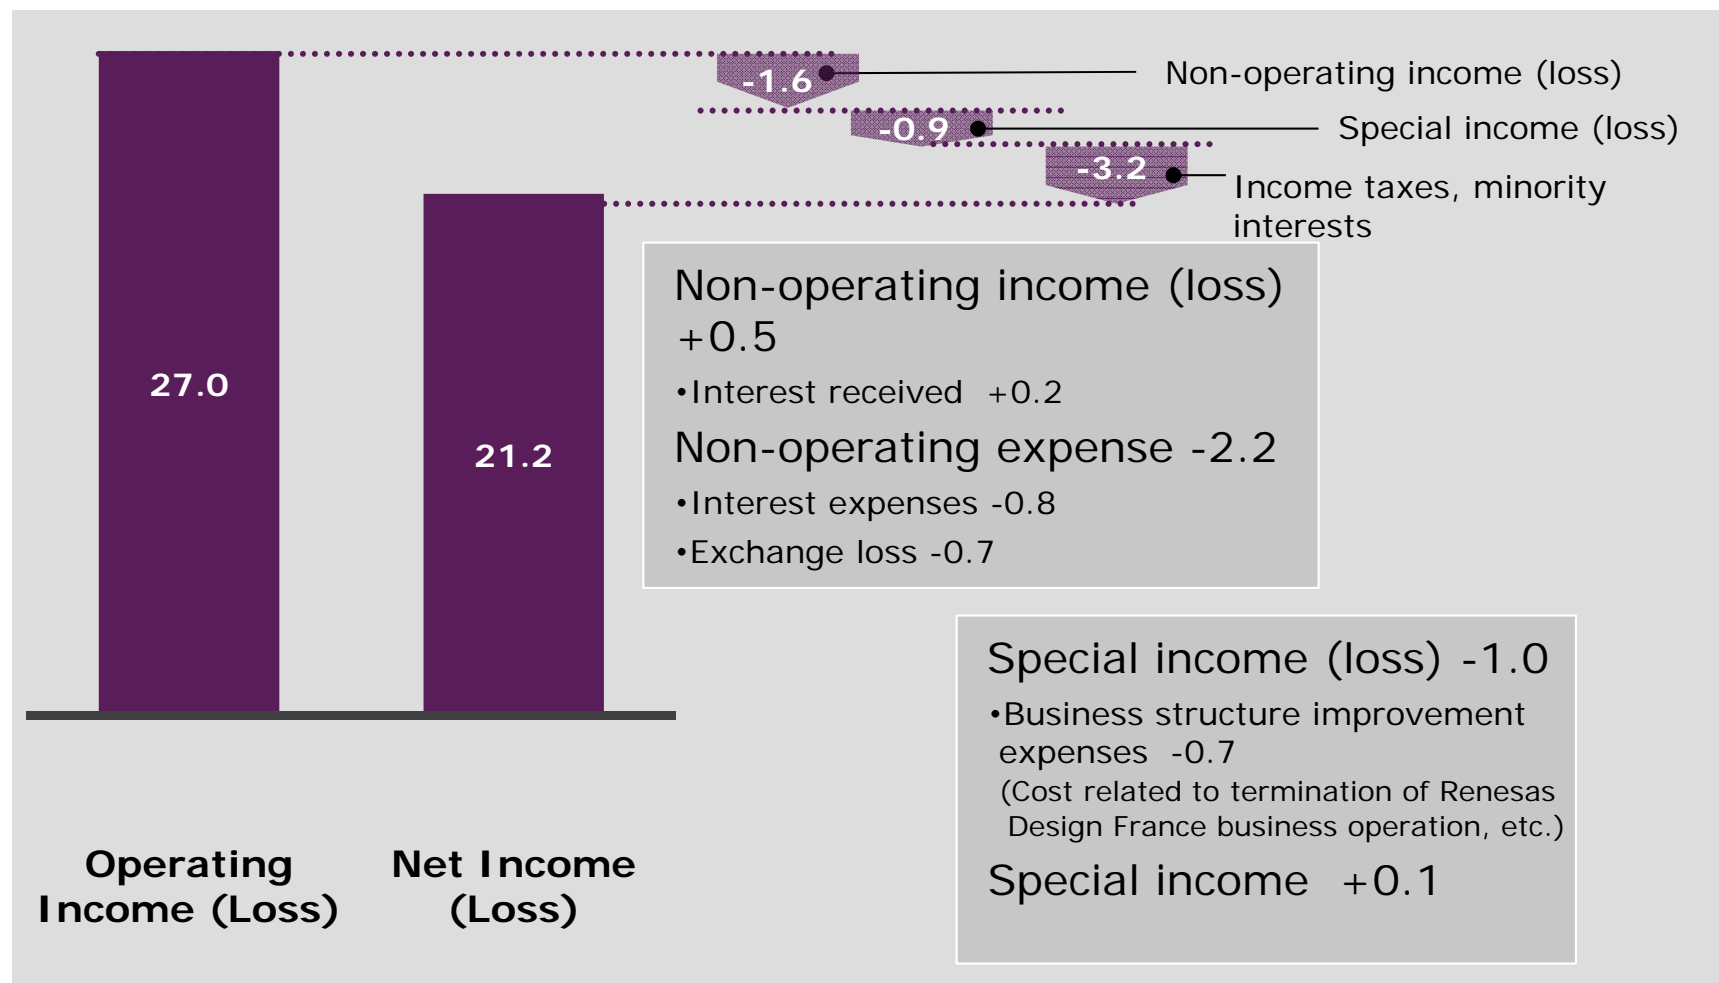

\*R&D: Research and Development, SG&A: Selling, general and administrative expenses

# FY15/3 Q1

## Net Income (Loss) (B yen)

- No major special loss was recorded and quarterly net income improved significantly both QoQ and YoY

# FY15/3 Q1

## Balance Sheets

- Despite recording net income, equity decreased slightly by applying the Accounting Standard for Retirement Benefits

(FOREWARD-LOOKING STATEMENTS)

The statements in this presentation with respect to the plans, strategies and forecasts of Renesas Electronics and its consolidated subsidiaries (collectively “we”) are forward-looking statements involving risks and uncertainties. We caution you in advance that actual results could differ materially from such forward-looking statements due to several factors. The important factors that could cause actual results to differ materially from such statements include, but are not limited to: general economic conditions in our markets, which are primarily Japan, North America, Asia and Europe; demand for, and competitive pricing pressure on, our products and services in the marketplace; our ability to continue to win acceptance of its products and services in these highly competitive markets; and movements in currency exchange rates, particularly the rate between the yen and the U.S. dollar. Among other factors, a worsening of the world economy; a worsening of financial conditions in the world markets, and a deterioration in the domestic and overseas stock markets, would cause actual results to differ from the projected results forecast.
