## **Chapter 1 Introduction**

The RH850/F1x Application Board is part of the RH850 Evaluation Platform and serves as a simple and easy to use platform for evaluating the features and performance of Renesas Electronics 32-bit RH850/F1x microcontrollers. The piggyback board (Y-RH850-F1X-272PIN-PB-T1-V1) can be used as a standalone board, or can be mated with a mainboard (e.g. Y-RH850-X1X-MB-T1-V1) for extended functionality.

#### Main features:

- Socket for mounting of device
- Standalone operation of the board
- Direct supply of device voltage (typ. 3.3V-5.0V)
- Device programming capability
- Device debugging capability
- Pin headers for direct access to each device pin
- Reset switch
- MainOSC and SubOSC circuitry
- · Connectors to MainBoard

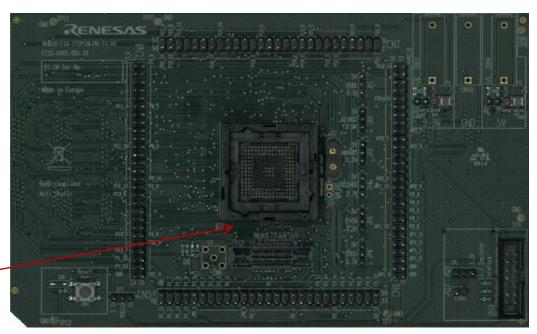

This document describes the functionality provided by the piggyback board and guides the user through its operation.

For details regarding the operation of the microcontroller, refer to the RH850/F1H User Manual.

## **Chapter 2 Overview**

#### 2.1 Overview

Figures 1 and 2 provide the views of the Piggyback Board.

Device pin #A1

Figure 1 – PiggyBoard top view

Figure 2 – PiggyBoard bottom view

## 2.2 Mounting of the device

The board is designed for use with the following devices:

• RH850/F1H-272

The device must be placed inside the socket IC1. To insert the device, press down the lid, align the #A1 pin of the device to the #A1pin of the socket, insert the device inside the socket and release the lid.

### **Chapter 3 Power supply**

#### 3.1 Board power connection

For operation of the device, a supply voltage must be connected to the board. Though a single supply voltage is sufficient for the operation of the device, two (different) voltages can be supplied to the board.

Within this document the following voltages are considered as 'typical' connections:

Voltage1 = 5.0V

Voltage2 = 3.3V

The following connectors are available to supply those voltages:

- Three 4mm 'banana-type' connectors:
  - Two red connectors for voltages Voltage1 (CN54) and Voltage2 (CN17).
  - A black connector for VSS connection (CN10).

**Note:** The three connectors are supplied with the board but not assembled.

- The E1 emulator that is used for debug purposes and flash programming can also supply a single operating voltage ('Dbg\_Voltage').
   The voltage is programmable via the E1 GUI as 3.3 or 5.0V (typ).
   See the documentation of the E1 and chapter 5 'Debug and Programming interface' for details.
- In case the PiggyBoard is mounted on a MainBoard, the voltages Voltage1
  and Voltage2 are supplied by the on-board regulators of the MainBoard.

**NOTE:** Do not supply any voltage directly to the PiggyBoard in case it is mounted on the MainBoard.

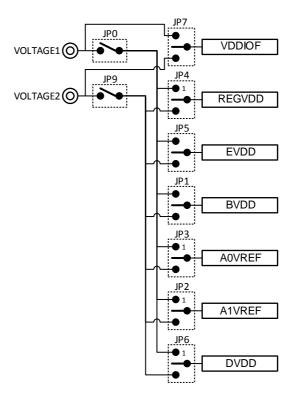

For each of the two voltages, 'Voltage 1 ' and 'Voltage 2', a green LED (LED1 and LED2) is available to signal that the related voltage is available on the PiggyBoard.

## 3.2 Voltage distribution

The table shows the required device power supply pins and their function:

Device supply pin	Function
REGVDD	Supply for the device <u>internal regulators</u> for the digital logic.
EVDD	Supply for ports.
BVDD	Supply for ports.
A0VREF	Supply for ports and analog functions of ADC0.
A1VREF	Supply for ports and analog functions of ADC1.
VDDIOF	IO supply voltage for the Mainboard.

 For each of the above voltages, the voltage source can be selected from Voltage1 (typ. 5.0V) or Voltage2 (typ. 3.3V) by the jumpers JP1-JP6, JP7, respectively the jumpers JP0, JP9.

## **Chapter 4 Clock sources**

Three external crystal oscillators for the device clock supply are provided with the board.

#### 4.1.1 MainOsc

A crystal or ceramic resonator in the range of 8MHz to 24MHz can be mounted on socket X1.

A 8MHz and a 16Mhz oscillator is supplied with the board.

#### 4.1.2 SubOSC

An oscillator with a frequency of 32.768kHz is supplied with the board and can be soldered into the connector X2.

## **Chapter 5 Debug and Programming interface**

For connection of the microcontroller debug and flash programming tools, the connector CN19 is provided.

The signal connection of the connector CN19 is shown in the picture below:

CN19 pin	Device Port	Device signal
1	JP0_2	DCUTCK / LPDCLK
2	GND	GND
3	JP0_4	DCUTRST
4	FLMD0	FLMD0
5	JP0_1	DCUTDO / LPDO
6	P10_8*	FLMD1
7	JP0_0	DCUTDI / LPDI
8	'Dbg_Voltage'	-
9	JP0_3	DCUTMS
10	-	-
11	JP0_5	DCURDY / LPDCLKOUT
12	GND	-
13	RESET	-
14	GND	-

<sup>\*</sup> In case the FLMD1 signal must be controlled by the debug/programming tool, the pin header JP11 must be closed.

The 'Dbg\_Voltage' (on CN19 pin 8) is monitored or supplied by the debug and flash programming tools. Therefore, it is necessary to select either Voltage1 (5V) or the Voltage2 (3.3V) by pin header JP10:

JP10 pin	Selection for Dbg_Voltage	
1-2	5V is selected	
2-3	3.3V is selected	

# **Chapter 6 Trace interface**

For connection of a trace tool the connector CN15 is provided.

The signal connection of the connector CN15 is shown in the picture below:

CN15 Pin	Function	Device pin	CN15 Pin	Function	Device pin
1	MDO12	P22_12	2	MDO13	P22_13
3	MDO14	P22_14	4	MDO15	P22_15
5	MDO09	P22_9	6	-	-
7		-	8	MDO08	P22_8
9	DBG-RESET	_RESET	10	EVTI-	-
11	DBG-TDO	JP0_1	12	VTREF	-
13	MDO10	P22_10	14	(DBG-RDY)	JP0_5
15	DBG-TCK	JP0_2	16	MDO07	P22_7
17	DBG-TMS	JP0_3	18	MDO06	P22_6
19	DBG-TDI	JP0_0	20	MDO05	P22_5
21	DBG_TRST	JP0_4	22	MDO04	P22_4
23	MDO11	P22_11	24	MDO03	P22_3
25	-	-	26	MDO02	P22_2
27		-	28	MDO01	P22_1
29	FLMD2	-	30	MDO00	P22_0
31	-	-	32	EVTO-	JP0_6
33	FLMD1	P10_8	34	MCKO	P21_4
35	-	-	36	MSEO1-	P21_3
37	FLMD0	FLMD0	38	MSEO0-	P21_2

## **Chapter 7 Connectors for ports of device**

Connection to each pin of the device is possible via the connectors CN5 to CN8.

Note: The pin headers are directly connected to the pins, therefore special care must be taken to avoid any electrostatic or other damage to the device.

#### 7.1 Push button for RESET

In order to issue a RESET to the device, the push-button SW1 is available.

#### 7.2 Connectors to MainBoard

Three connectors (CN1 to CN3) are available to connect the PiggyBoard to a MainBoard.

The signal connection of each connector is described in the following tables:

#### 7.2.1 Connector CN1

Pin	Function	Device Port	Pin	Function	Device Port
1	VOLTAGE1	-	2	VOLTAGE1	-
3	VOLTAGE1	-	4	VOLTAGE1	-
5	RESET	_RESET	6	NMI	P9_0

# **Chapter 8 Mechanical dimensions**

# **Chapter 9 Schematic**

# **Chapter 10 Revision History**

The table provides information about the major changes of the document versions.

Date	Version	Description
2014-08-01	1.0	Initial release
2015-10-21	1.1	Updated description of chapter '3.2 Voltage distribution'. Updated schematic for improved readability (content unchanged). Updated description of CN1, pin115, pin 116, chapter 6.2.1. Updated description of CN19, pin6, chapter 5.

#### **Notice**

- All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
- 2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
- 3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
- 4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
- 5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
- 6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
- 7. Renesas Electronics products are classified according to the following three quality grades: "Standard", "High Quality", and "Specific". The recommended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as "Specific" without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as "Specific" or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics.

The quality grade of each Renesas Electronics product is "Standard" unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.

- "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.
- "High Quality":Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.
- "Specific": Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
- 8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.

- 9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
- 10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
- 11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.
- 12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.
  - (Note 1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.
  - (Note 2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
