Renesas Solutions Corp.

This document contains the information necessary for using this product. Be sure to read this before using the product.

Introduction

The R0E420000MCU00 is an MCU unit for the H8S/Tiny Series of Renesas 16-bit MCUs.

Product Outline

This product consists of the following two products.

- (1) MCU Unit: R0E420000MCU00
This is an MCU unit (board) for the H8S/Tiny Series.
- (2) H8S/Tiny H8S/2400 E100 Emulator Software
The Included software is stored in the CD-ROM.
 - H8S/Tiny H8S/2400 E100 Emulator Debugger
This is a control software for the H8S/Tiny E100 Emulator to control the R0E420000MCU00 emulator.

Installing the Included Software Products

After inserting the included CD-ROM into the host machine's CD-ROM drive, the installation window will open. Select the product to be installed and click "Install" button.

Before installing the debugger, check that the High-performance Embedded Workshop is not started up on the PC environment you use and that any Renesas emulator is not connected to the PC.

- * If using Windows Vista®, Windows® XP or Windows® 2000 as the host machine OS, have the software installed by someone of administrator access level. Installation cannot be completed by users with lower access level status.

When a PC Running Windows Vista® Cannot Communicate with the Emulator

After connecting the emulator to the host machine, power on the E100 emulator. Then open the Device Manager and select Renesas USB Driver, and open its [Properties] dialog box. On [General] tab you can check the [Device status]. If it does not show "This device is working properly.", follow the procedure listed below to install the USB driver manually.

1. Double click dpinst.exe stored in the attached CD-ROM, in a directory:
<drive name>\e100_h8s\drivers\2000_XP_Vista\32bit\, to execute dpinst.exe.
 2. You'll see a [User Account Control] dialog box titled "An unidentified program wants access to your computer" and stating "Don't run the program unless you know where it's from or you've used it before." To continue the installation, click [Allow].
- * dpinst.exe is a driver package installation utility provided by Microsoft.
3. When [Device Driver Installation Wizard] appears, click the [Next] button.
 4. A dialog box appears asking "Would you like to install this device software?" Then, click the [Install] button.
 5. When the driver installation is complete, click the [Finish] button on the [Device Driver Installation Wizard].
