## A Note on Using Flash Development Toolkit --With Erasing Flash Memory--

Please take note of the following problem in using Flash Development Toolkit:

- With erasing flash memory
- 

### 1. Product and Versions Concerned

Flash Development Toolkit

V.4.00 Release 00 through V.4.04 Release 00

### 2. MCUs Involved

In the 740 family, the MCUs of the flash-memory type are involved in this problem.

### 3. Description

When you erase the built-in flash memory, the status bar that indicates the progress of erasing memory may stop responding.

Note, however, that this problem arises from longer processing time taken by Flash Development Toolkit, and the erase function of built-in flash memory is normal.

### 4. Schedule of Fixing the Problem

This problem has already been fixed in Flash Development Toolkit V.4.05 Release 00, so update yours to it. The update program can be downloaded from:

[https://www.renesas.com/fdt\\_download](https://www.renesas.com/fdt_download)

The above URL is one of our global sites.
