The E200F Emulator Software Revised to V.1.02 Release 00

We have revised the emulator software for the E200F emulator of type R0E0200F0EMU00 to V.1.02 Release 00. This emulator software is used for the specific series in the SuperH RISC engine family of MCUs.

---

1. **Product and Versions Concerned**
   Emulator software V.1.00 Release 00 through V.1.01 Release 00 used for the E200F emulator of type R0E0200F0EMU00 (*)

   * The product of type R0E0200F0EMU00 is capable of debugging programs created for the MCUs using the SH-4A or SH4AL-DSP CPU core, SuperH RISC engine family.

2. **Description of Revision**
   The SH7780 group of MCUs added to the support line.

3. **How to Revise Yours**
   Follow these steps to revise yours to V.1.01 Release 00:
   (1) If you have not already installed the emulator software for the E200F, execute the Setup.exe file contained in your CD-ROM of the emulator software to install it.
   (2) Download the latest version of the High-performance Embedded Workshop to update yours from HERE.
   (3) Download the update program to the E200 emulator software V.1.02 Release 00 from HERE.
   (4) Decompress the downloaded .zip file to obtain the Setup.exe file, and then execute it.
