---

1. Products and Versions Concerned
   The two products listed below will be revised and their version numbers will be changed as follows.

   (1) RX code generator for CS+:
       from V1.03.00 to V1.04.00

   (2) RL78 code generator for CS+ (CS+ for CA, CX):
       from V2.05.00 to V2.06.00

2. Description of Revision
   (1) RX code generator for CS+
      The following group has been added to the set of supported MCUs.
      - RX Family: RX113 group

   (2) RL78 code generator for CS+ (CS+ for CA, CX)
      The following group has been added to the set of supported MCUs.
      - RL78 Family: RL78/G1G group

3. Updating Your Product
   Online updating is available free of charge.
   To update your code generator, use either of the following methods,
   whether you have the CS+ product version or the free evaluation version:

   If your product is CubeSuite+ V2.02.00 or an earlier version, you will
   need to update your CS+ to V 3.00.00 in advance.

   Download the free evaluation version of CS+ V3.00.00 from the following

URL.

(1) Use the Update Manager
   On the "Start" menu, select "Programs" and then "Renesas Electronics
   CS+" to start the Update Manager (this service will be available on
   and after December 5).

   Note: If you have launched CS+ with rapid startup enabled,
       exit from CS+ once, and then run the Update Manager.
       If the CS+ is resident in the notification area of Windows
       (system tray) due to rapid startup, attempting to run the
       Update Manager produces an error and the following message.

       M0120001
       Installation is suspended because "CS+ W.exe"
       is running.
       It will be resumed next time you start the tool.
