

R-Car Proactive Partner Solution IoT.bzh redpesk

Solution Summary

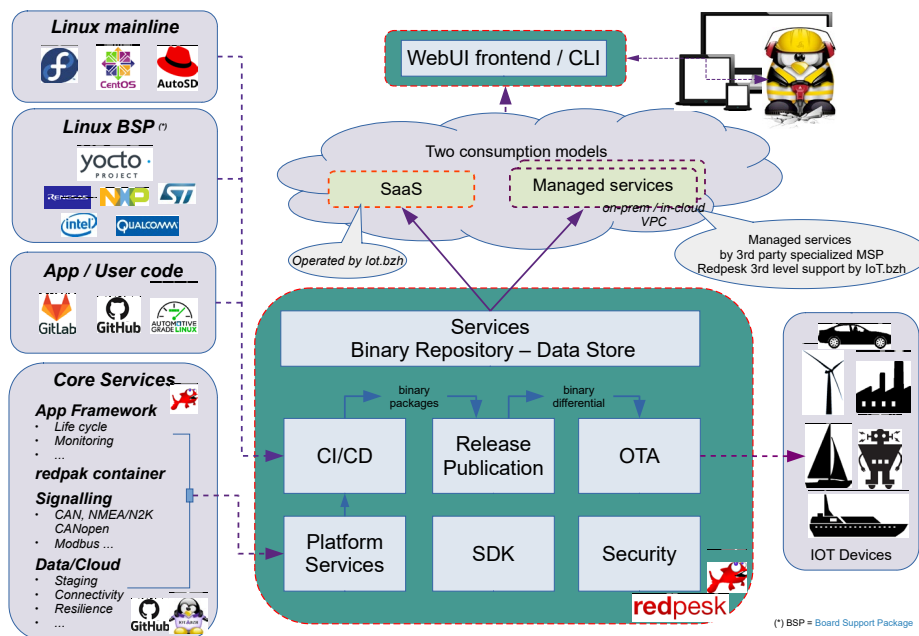

Our solution is an all-in-one embedded Linux platform (factory and distribution) based on IT technology adapted to embedded constraints (www.redpesk.bzh)

Features/Benefits

- Easy-to-use
- Long Term Support
- Cybersecurity
- Lean R&D projects

redpesk enables fast embedded Linux projects as no build system expertise is required to use it. Leveraging IT standard distributions, we can propose +10 years LTS. Then we maximize cybersecurity automation. Last but not least, our solution is modular and allows clear responsibility split between R&D teams.
