

June 29, 2021

Dear Valued Customer,

NOTICE OF IATF RECERTIFICATION SCHEDULE UPDATES AT NAKA FACTORY

Due to the fire accident on March 19, 2021, the regular IATF 16949 recertification audit had to be cancelled. Following the IATF rules Naka factory consequently lost the certification.

The production level has returned to 100% of the pre-fire level. A stable production period of at least 3 months is required before the certification can be renewed. Therefore, we decided to undergo an audit for the IATF recertification from September 28th to October 1st, 2021.

Regarding the latest information about recovery, please see notices in the press center on [Renesas website](#).

Sincerely yours,

Hiroshi Nagamizu, Vice President
Quality Assurance Division
Renesas Electronics Corporation
