Errata Notification

EN #: **NEN-16-01**

Errata Revision #: 0

Issue Date: June 24, 2016

Effective Date: June 24, 2016

IDT Product Affected: 8T73S208BNLGI, 8T73S208BNLGI8

Contact: Andreas Guenther

Title: Product Marketing

Phone #: 49 89 37448-132

E-mail: Andreas.Guenther@idt.com

ERRATA DETAILS:

ATTACHMENT

☐ Yes ☒ No

☒ Data Sheet Errata

☐ Device Errata

☐ Device Manual Errata

☐ Application Notes Errata

☐ Other (Please Specify)

In order to clarify output enable operation in data sheet, the following was added.

The device supports the enable/disable of individual outputs. During an active operation of the device, enabling individual previously disabled outputs may degrade signal integrity of already enabled active outputs during the enabling transition. Disabling multiple outputs is supported without signal integrity constraints

The updated Datasheet will be provided in a separate distribution

CUSTOMER NOTIFICATION:

As a result of Errata listed above, IDT has decided to notify you through this Errata Notification.

We recommend you to review this notification in details prior to the use of affected product in your application.

Please use acknowledgement below or E-Mail to request additional information.

If you have any questions, please feel free to contact your local IDT distributor or sales representative.
