To our customers,

Old Company Name in Catalogs and Other Documents

On April 1st, 2010, NEC Electronics Corporation merged with Renesas Technology Corporation, and Renesas Electronics Corporation took over all the business of both companies. Therefore, although the old company name remains in this document, it is a valid Renesas Electronics document. We appreciate your understanding.

Send any inquiries to http://www.renesas.com/inquiry.

Notice

1. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
7. Renesas Electronics products are classified according to the following three quality grades: "Standard", "High Quality", and "Specific". The recommended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as "Specific" without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as "Specific" or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is "Standard" unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.

   "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.

   "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.

   "Specific": Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.

(Note 1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.

(Note 2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.

RENESAS

DATA SHEET

BIPOLAR ANALOG INTEGRATED CIRCUIT

μPC3221GV

GENERAL PURPOSE 5 V 100 MHz AGC AMPLIFIER

DESCRIPTION

The μPC3221GV is a silicon monolithic IC designed for use as AGC amplifier for digital CATV, cable modem systems. This IC consists of gain control amplifier and video amplifier.

The package is 8-pin SSOP suitable for surface mount.

This IC is manufactured using our 10 GHz f_T NESAT II AL silicon bipolar process. This process uses silicon nitride passivation film. This material can protect chip surface from external pollution and prevent corrosion/migration. Thus, this IC has excellent performance, uniformity and reliability.

FEATURES

- Low distortion : IM_3 = 56 dBc TYP. @ single-ended output, V_{out} = 0.7 V_{p-p}/tone
- Low noise figure : NF = 4.2 dB TYP.
- Wide AGC dynamic range : GCR = 50 dB TYP. @ input prescribe
- On-chip video amplifier : V_{out} = 1.0 V_{p-p} TYP. @ single-ended output
- Supply voltage : V_{CC} = 5.0 V TYP.
- Packaged in 8-pin SSOP suitable for surface mounting

APPLICATION

- Digital CATV/Cable modem receivers

ORDERING INFORMATION

Part Number	Package	Supplying Form
μPC3221GV-E1	8-pin plastic SSOP (4.45 mm (175))	• Embossed tape 8 mm wide • Pin 1 indicates pull-out direction of tape • Qty 1 kpcs/reel

Remark To order evaluation samples, contact your nearby sales office.
Part number for sample order: μPC3221GV

Caution Observe precautions when handling because these devices are sensitive to electrostatic discharge.

The information in this document is subject to change without notice. Before using this document, please confirm that this is the latest version.
Not all devices/types available in every country. Please check with local NEC Compound Semiconductor Devices representative for availability and additional information.

PRODUCT LINE-UP OF 5 V AGC AMPLIFIER

Part Number	I_{CC} (mA)	G_{MAX} (dB)	G_{MIN} (dB)	GCR (dB)	NF (dB)	IM_3 (dBc) Note	Package
μPC3217GV	23	53	0	53	6.5	50	8-pin SSOP (4.45 mm (175))
μPC3218GV	23	63	10	53	3.5	50	
μPC3219GV	36.5	42.5	0	42.5	9.0	58	
μPC3221GV	33	60	10	50	4.2	56	

Note f_1 = 44 MHz, f_2 = 45 MHz, V_{out} = 0.7 V_{p-p}/tone, single-ended output

PIN EXPLANATIONS

Pin No.	Pin Name	Applied Voltage (V)	Pin Voltage (V) Note	Function and Application	Internal Equivalent Circuit
1	V_{CC}	4.5 to 5.5	–	Power supply pin. This pin should be externally equipped with bypass capacitor to minimize ground impedance.	———
2	INPUT1	–	1.29	Signal input pins to AGC amplifier. This pin should be coupled with capacitor for DC cut.	3	INPUT2	–	1.29		
4	V_{AGC}	0 to V_{CC}	–	Gain control pin. This pin's bias govern the AGC output level. Minimum Gain at V_{AGC} : 0 to 0.5 V Maximum Gain at V_{AGC} : 3 to 3.5 V Recommended to use AGC voltage with externally resister (example: 1 kΩ).	5	GND2	0	–	Ground pin. This pin should be connected to system ground with minimum inductance. Ground pattern on the board should be formed as wide as possible.	———
6	OUTPUT2	–	2.28	Signal output pins of video amplifier. This pin should be coupled with capacitor for DC cut.	7	OUTPUT1	–	2.28		
8	GND1	0	–	Ground pin. This pin should be connected to system ground with minimum inductance. Ground pattern on the board should be formed as wide as possible. All ground pins must be connected together with wide ground pattern to decrease impedance difference.	———

Note Pin voltage is measured at V_{CC} = 5.0 V.

ABSOLUTE MAXIMUM RATINGS

Parameter	Symbol	Test Conditions	Ratings	Unit
Supply Voltage	V_{CC}	T_A = +25°C	6.0	V
Gain Control Voltage Range	V_{AGC}	T_A = +25°C	0 to V_{CC}	V
Power Dissipation	P_D	T_A = +85°C **Note**	250	mW
Operating Ambient Temperature	T_A		–40 to +85	°C
Storage Temperature	T_{stg}		–55 to +150	°C

Note Mounted on double-sided copper-clad 50 × 50 × 1.6 mm epoxy glass PWB

RECOMMENDED OPERATING RANGE

Parameter	Symbol	Test Conditions	MIN.	TYP.	MAX.	Unit
Supply Voltage	V_{CC}		4.5	5.0	5.5	V
Operating Ambient Temperature	T_A	V_{CC} = 4.5 to 5.5 V	–40	+25	+85	°C
Gain Control Voltage Range	V_{AGC}		0	–	3.5	V
Operating Frequency Range	f_{BW}		10	45	100	MHz

ELECTRICAL CHARACTERISTICS
(T_A = +25°C, V_{CC} = 5 V, f = 45 MHz, Z_S = 50 Ω, Z_L = 250 Ω, single-ended output)

Parameter	Symbol	Test Conditions	MIN.	TYP.	MAX.	Unit
DC Characteristics						
Circuit Current	I_{CC}	No input signal **Note 1**	26	33	41	mA
AGC Pin Current	I_{AGC}	No input signal, V_{AGC} = 3.5 V **Note 1**	–	16	50	μA
AGC Voltage High Level	$V_{AGC (H)}$	@ Maximum gain **Note 1**	3.0	–	3.5	V
AGC Voltage Low Level	$V_{AGC (L)}$	@ Minimum gain **Note 1**	0	–	0.5	V
RF Characteristics						
Maximum Voltage Gain	G_{MAX}	V_{AGC} = 3.0 V, P_{in} = –60 dBm **Note 1**	57	60	63	dB
Middle Voltage Gain 1	$G_{MID}1$	V_{AGC} = 2.2 V, P_{in} = –60 dBm **Note 1**	47.5	50.5	53.5	dB
Middle Voltage Gain 2	$G_{MID}2$	V_{AGC} = 1.2 V, P_{in} = –30 dBm **Note 1**	18	21	24	dB
Minimum Voltage Gain	G_{MIN}	V_{AGC} = 0.5 V, P_{in} = –30 dBm **Note 1**	6	10	14	dB
Gain Control Range (input prescribe)	GCR_{in}	V_{AGC} = 0.5 to 3.0 V **Note 1**	43	50	–	dB
Gain Control Range (output prescribe)	GCR_{out}	V_{out} = 1.0 V_{p-p} **Note 1**	36	40	–	dB
Gain Slope	G_{slope}	Gain (@ V_{AGC} = 2.2 V) – Gain (@ V_{AGC} = 1.2 V) **Note 1**	26.5	29.5	32.5	dB/V
Maximum Output Voltage	V_{oclip}	V_{AGC} = 3.0 V (@ Maximum gain) **Note 1**	2.0	2.8	–	V_{p-p}
Noise Figure	NF	V_{AGC} = 3.0 V (@ Maximum gain) **Note 3**	–	4.2	5.7	dB
3rd Order Intermodulation Distortion 1	IM_31	f_1 = 44 MHz, f_2 = 45 MHz, Z_L = 250 Ω, P_{in} = –30 dBm/tone, V_{out} = 0.7 V_{p-p}/tone (@ single-ended output) **Note 1**	43	47	–	dBc
3rd Order Intermodulation Distortion 2	IM_32	f_1 = 44 MHz, f_2 = 45 MHz, Z_L = 250 Ω, V_{AGC} = 3.0 V (@ Maximum gain), V_{out} = 0.7 V_{p-p}/tone (@ single-ended output) **Note 1**	50	56	–	dBc
Gain Difference of OUTPUT1 and OUTPUT2	⊿G	V_{AGC} = 3.0 V, P_{in} = –60 dBm, ⊿G = G (@ $P_{out}1$) – G (@ $P_{out}2$) **Note 1, 2**	–0.5	0	+0.5	dB

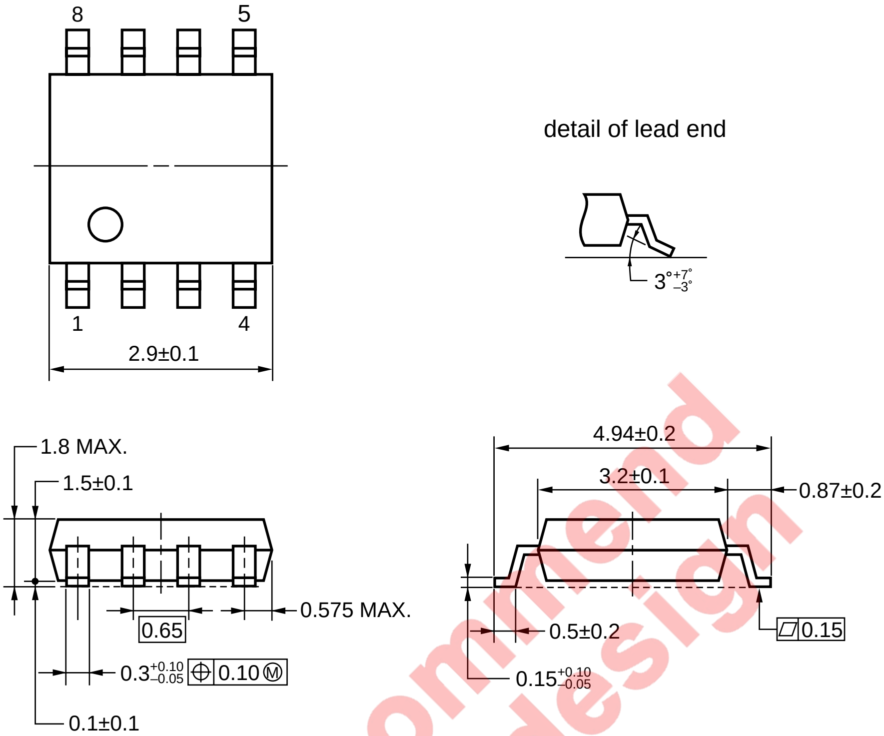
∇2 : 45 MHz	8.998 Ω	1.887 Ω	6.675 nH
∇3 : 100 MHz	7.266 Ω	6.750 Ω	10.74 nH

PACKAGE DIMENSIONS

8-PIN PLASTIC SSOP (4.45 mm (175)) (UNIT: mm)



NOTES ON CORRECT USE

(1) Observe precautions for handling because of electro-static sensitive devices.
(2) Form a ground pattern as widely as possible to minimize ground impedance (to prevent undesired oscillation). All the ground pins must be connected together with wide ground pattern to decrease impedance difference.
(3) The bypass capacitor should be attached to V_{CC} line.

RECOMMENDED SOLDERING CONDITIONS

This product should be soldered and mounted under the following recommended conditions. For soldering methods and conditions other than those recommended below, contact your nearby sales office.

Soldering Method	Soldering Conditions	Condition Symbol
Infrared Reflow	Peak temperature (package surface temperature) : 260°C or below Time at peak temperature : 10 seconds or less Time at temperature of 220°C or higher : 60 seconds or less Preheating time at 120 to 180°C : 120±30 seconds Maximum number of reflow processes : 3 times Maximum chlorine content of rosin flux (% mass) : 0.2%(Wt.) or below	IR260
VPS Note	Peak temperature (package surface temperature) : 215°C or below Time at temperature of 200°C or higher : 25 to 40 seconds Preheating time at 120 to 150°C : 30 to 60 seconds Maximum number of reflow processes : 3 times Maximum chlorine content of rosin flux (% mass) : 0.2%(Wt.) or below	VP215
Wave Soldering	Peak temperature (molten solder temperature) : 260°C or below Time at peak temperature : 10 seconds or less Preheating temperature (package surface temperature) : 120°C or below Maximum number of flow processes : 1 time Maximum chlorine content of rosin flux (% mass) : 0.2%(Wt.) or below	WS260
Partial Heating	Peak temperature (pin temperature) : 350°C or below Soldering time (per side of device) : 3 seconds or less Maximum chlorine content of rosin flux (% mass) : 0.2%(Wt.) or below	HS350

Note Excluding lead-free products

Caution Do not use different soldering methods together (except for partial heating).
