Manufacturing Bulletin

Subject: Implementation of Prop65 warning label
Date: Nov 28, 2018

Integrated Device Technology, Inc. will implement warning label of prop65. The label is to be added if it's required for all the shipments in Reel, Tray & Tube form effective date 10 Dec, 2018. The purpose of this change is to meet California Proposition 65 Warning Regulation i.e. Provide a "clear and reasonable" warning before knowingly and intentionally exposing anyone to a Proposition 65 chemical.

The minor changes as stated below:

1.) To add Prop65 Warning Label for shipments with products which contain lead.

Note: Except this is not applicable to IDT wafer and die sales shipment.

Kindly refer to the attachments for the Prop65 warning Label and the label placement on MBB/Shielding bag.

Please note that this change will not impact the current other labels on shipment packaging.

During the transition period, customer may receive shipments in previous and new labeling methods; however each shipment will contain either with or without warning label and not mixed.

Yours sincerely,

LS Koay
