

To our customers,

Old Company Name in Catalogs and Other Documents

On April 1st, 2010, NEC Electronics Corporation merged with Renesas Technology Corporation, and Renesas Electronics Corporation took over all the business of both companies. Therefore, although the old company name remains in this document, it is a valid Renesas Electronics document. We appreciate your understanding.

Renesas Electronics website: <http://www.renesas.com>

Renesas Electronics Corporation

Issued by: Renesas Electronics Corporation (<http://www.renesas.com>)

Send any inquiries to <http://www.renesas.com/inquiry>.

Notice

1. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
7. Renesas Electronics products are classified according to the following three quality grades: “Standard”, “High Quality”, and “Specific”. The recommended applications for each Renesas Electronics product depends on the product’s quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as “Specific” without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as “Specific” or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is “Standard” unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.
 - “Standard”: Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.
 - “High Quality”: Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.
 - “Specific”: Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.

(Note 1) “Renesas Electronics” as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.

(Note 2) “Renesas Electronics product(s)” means any product developed or manufactured by or for Renesas Electronics.

Regional Information

Some information contained in this document may vary from country to country. Before using any NEC product in your application, please contact the NEC office in your country to obtain a list of authorized representatives and distributors. They will verify:

- Device availability
- Ordering information
- Product release schedule
- Availability of related technical literature
- Development environment specifications (for example, specifications for third-party tools and components, host computers, power plugs, AC supply voltages, and so forth)
- Network requirements

In addition, trademarks, registered trademarks, export restrictions, and other legal issues may also vary from country to country.

PREFACE

Readers	This manual is intended for user engineers who wish to design and develop application systems of the V850 family™ by using in-circuit emulator IE-70300x-MC and communication module IE-70000-MC-SV2.
Purpose	<p>The IE-70000-MC-IF is a network module adapter to manipulate in-circuit emulator IE-70300x-MC from a host machine by using the IE-70000-MC-SV2 via ethernet™ (10BASE-T).</p> <p>This manual explains the basic specifications of and how to use the IE-70000-MC-IF.</p>
Organization	<p>This manual is broadly divided into the following parts:</p> <ul style="list-style-type: none">GeneralInstallationAppendix
How to Read This Manual	<p>It is assumed that the readers of this manual have general knowledge on electricity, logic circuits, and microcontrollers.</p> <p>To understand the overall basic specifications and usage: -> Read this manual in the order of the Table of Contents.</p> <p>To learn how to operate the IE-70300x-MC or its command functions: -> Refer to the manual of the source debugger (optional).</p> <p>To learn how to operate and install the IE-70300x-MC: -> Refer to the manual of the in-circuit emulator (optional).</p>
Legend	<p>Note: Explanation of items marked with “Note” in the text</p> <p>Caution: Description of points that require particular attention</p> <p>Remark: Supplementary information</p>

CHAPTER 1 GENERAL

The IE-70000-MC-IF communication module adapter is required for using the IE-70000-MC-SV2 communication module with a V850 family in-circuit emulator, such as the IE-703000-MC-A, IE-703002-MC, and IE-703003-MC.

By using the IE-70000-MC-SV2, the in-circuit emulator of the V850 family, which has been conventionally controlled by using a personal computer and an interface board, can be controlled by a workstation or personal computer via Ethernet (10BASE-T).

Figure 1-1 shows an example of system configuration using the IE-70000-MC-IF.

Figure 1-1. Example of System Configuration Using IE-70000-MC-IF

[MEMO]

CHAPTER 2 INSTALLATION

2.1 Unpacking

Confirm that the following items are contained in the carton box of the IE-70000-MC-IF when unpacking the box.

- (1) IE-70000-MC-IF (communication module adapter): 1
- (2) User's manual: 1
- (3) Warranty: 1

2.2 Appearance

Figure 2-1 shows the appearance of the IE-70000-MC-IF.

Figure 2-1. Appearance of IE-70000-MC-IF

2.3 Connection

Figure 2-2 illustrates how to connect the IE-70000-MC-IF. Before making connections, be sure to turn off its power.

<1> Connecting in-circuit emulator and IE-70000-MC-IF

Connect the interface cable (accessory) of the in-circuit emulator to the connected marked "IE" of the IE-70000-MC-IF (refer to <1> in Figure 2-2).

<2> Connecting IE-70000-MC-IF and IE-70000-MC-SV2

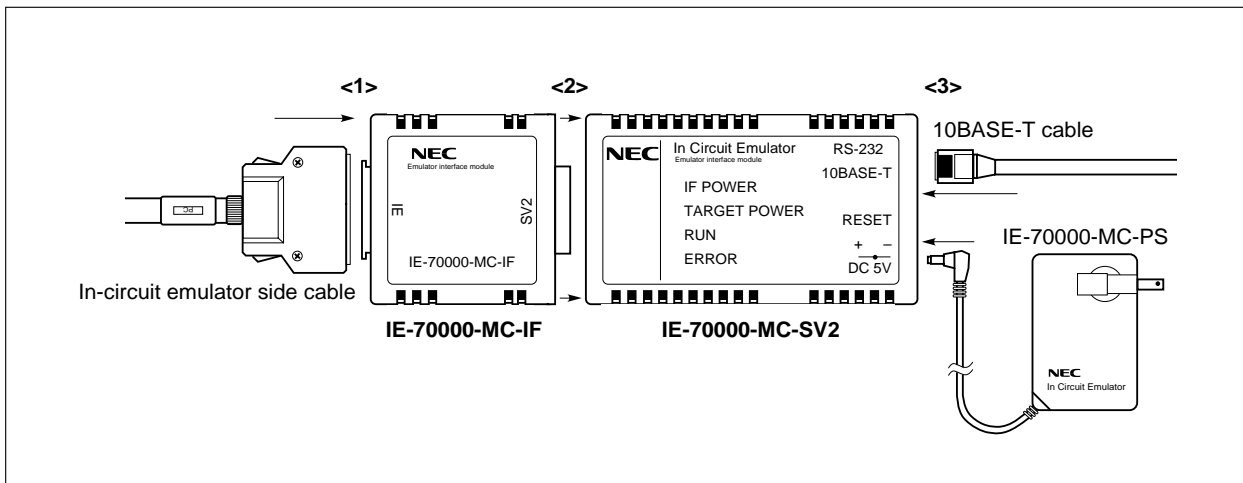

Connect the blue connector marked "SV2" of the IE-70000-MC-IF to the blue connector of the IE-70000-MC-SV2 (refer to <2> in Figure 2-2).

Caution Because the IE-70000-MC-SV2 and IE-70000-MC-IF are connected directly by their connectors, the vertical strength of the connection is relatively low. Therefore, make sure that no excessive force is applied to the IE-70000-MC-SV2 and IE-70000-MC-IF, especially to their connection; otherwise, the IE-70000-MC-SV2 and IE-70000-MC-IF may be damaged or faulty contact may occur.

<3> Connecting IE-70000-MC-SV2, 10BASE-T cable, and IE-70000-MC-PS

For how to connect each part, refer to the User's Manual of the IE-70000-MC-SV2 (refer to <3> in Figure 2-2).

Figure 2-2. Connections of IE-70000-MC-IF

2.4 Power-up/down Sequence

After making connections, turn on the power. Be sure to turn the power on/off in the following sequence.

(1) Power-up sequence

<1> Turn on the power to the IE-70000-MC-SV2. This will also automatically supply power to the IE-70000-MC-IF.

<2> Turn on the power to the in-circuit emulator.

<3> Turn on the power to the target system.

(2) Power-down sequence

<1> Turn off the power to the target system.

<2> Turn off the power to the in-circuit emulator.

<3> Turn off the power to the IE-70000-MC-SV2. This will also automatically turn off the power to the IE-70000-MC-IF.
