

To our customers,

Old Company Name in Catalogs and Other Documents

On April 1st, 2010, NEC Electronics Corporation merged with Renesas Technology Corporation, and Renesas Electronics Corporation took over all the business of both companies. Therefore, although the old company name remains in this document, it is a valid Renesas Electronics document. We appreciate your understanding.

Renesas Electronics website: <http://www.renesas.com>

Renesas Electronics Corporation

Issued by: Renesas Electronics Corporation (<http://www.renesas.com>)

Send any inquiries to <http://www.renesas.com/inquiry>.

Notice

1. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
7. Renesas Electronics products are classified according to the following three quality grades: “Standard”, “High Quality”, and “Specific”. The recommended applications for each Renesas Electronics product depends on the product’s quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as “Specific” without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as “Specific” or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is “Standard” unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.
 - “Standard”: Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.
 - “High Quality”: Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.
 - “Specific”: Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.

(Note 1) “Renesas Electronics” as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.

(Note 2) “Renesas Electronics product(s)” means any product developed or manufactured by or for Renesas Electronics.

Keep safety first in your circuit designs!

- Renesas Technology Corporation puts the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage. Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (i) placement of substitutive, auxiliary circuits, (ii) use of nonflammable material or (iii) prevention against any malfunction or mishap..

Notes regarding these materials

- These materials are intended as a reference to assist our customers in the selection of the Renesas Technology Corporation product best suited to the customer's application; they do not convey any license under any intellectual property rights, or any other rights, belonging to Renesas Technology Corporation or a third party.
- Renesas Technology Corporation assumes no responsibility for any damage, or infringement of any third-party's rights, originating in the use of any product data, diagrams, charts, programs, algorithms, or circuit application examples contained in these materials.
- All information contained in these materials, including product data, diagrams, charts, programs and algorithms represents information on products at the time of publication of these materials, and are subject to change by Renesas Technology Corporation without notice due to product improvements or other reasons. It is therefore recommended that customers contact Renesas Technology Corporation or an authorized Renesas Technology Corporation product distributor for the latest product information before purchasing a product listed herein. Please also pay attention to information published by Renesas Technology Corporation by various means, including the Renesas Technology Corporation Semiconductor home page (<http://www.renesas.com>).
- The information described here may contain technical inaccuracies or typographical errors. Renesas Technology Corporation assumes no responsibility for any damage, liability, or other loss rising from these inaccuracies or errors.
- When using any or all of the information contained in these materials, including product data, diagrams, charts, programs, and algorithms, please be sure to evaluate all information as a total system before making a final decision on the applicability of the information and products. Renesas Technology Corporation assumes no responsibility for any damage, liability or other loss resulting from the information contained herein.
- Renesas Technology Corporation semiconductors are not designed or manufactured for use in a device or system that is used under circumstances in which human life is potentially at stake. Please contact Renesas Technology Corporation or an authorized Renesas Technology Corporation product distributor when considering the use of a product contained herein for any specific purposes, such as apparatus or systems for transportation, vehicular, medical, aerospace, nuclear, or undersea repeater use.
- The prior written approval of Renesas Technology Corporation is necessary to reprint or reproduce in whole or in part these materials.
- Please contact Renesas Technology Corporation for further details on these materials or the products contained therein.

Precautions on Using The Product Described Herein

- The product described herein should be used in combination with the parts included with the starter kit. If the product is operated in combination with any other item, its operation cannot be guaranteed. Nor will requests for help or suggestion be answered.
- Renesas Technology Corporation and Renesas Solutions Corporation will not assume any responsibility for the results of development no matter what systems may have been developed by customers by using the product described herein.
- Guarantee for the product described herein shall conform to stipulations under which guarantee is provided for the starter kit.
- The product described herein was prepared assuming it will be used in a laboratory or similar environment for program development or evaluation purposes. It is not covered in the electrical product safety laws, nor is it protected against electromagnetic hazards for use in Japan or elsewhere.

Summary of changes

Version	Date	Content
1.00	'03.7.2	Made.
1.01	'03.8.29	Added connection diagram and component table.

Contents

- 1. Application 5
- 2. Specifications 5
 - 2.1 Outline of Specifications 5
 - 2.2 Detail Specifications 6
- 3 Reference data 8
 - 3.1 Connection Diagram and Part List 8

1. Application

This specification stipulates hardware specifications of the Pitch Converter M3A-2191 which converts connector pitches from the M3A-2195/M3A-2190 connector (10-pin) of the SDI interface board for the M32R to the YDC-manufactured EZlyzer connector (34-pin) mounted on the M32R/ECU#4 Evaluation Board "M3A-2114G02/G12/G22."

2. Specifications

2.1 Outline of Specifications

Table 2.1 lists specifications of the M3A-2191. Figure 2.1 shows a connection diagram for the M3A-2191.

Table 2.1 Specifications of the M3A-2191

Item	Specification	Useful product
Applicable emulator	M32100T-SDI, M3A-2195/M3A-2190	
Pitch conversion	MCU control interface connector on emulator SDI for the M32R ↓ M32R SDI connector to connect EZlyzer made by YDC	Made by Omron : XG4M-1030-U ICE32R-SDI-MCUCTL cable & connector Made by Yamaichi : NFP-34A-0134-BS or NFP-34A-0132-BS or NFP-34A-0122-BF
Connector (J1)	Connects to ICE32R-SDI-MCUCTL	Made by Omron : XG4C-1031
Connector (J2)	Connects to the target board	Made by Yamaichi : NFS-34A-1314-BS

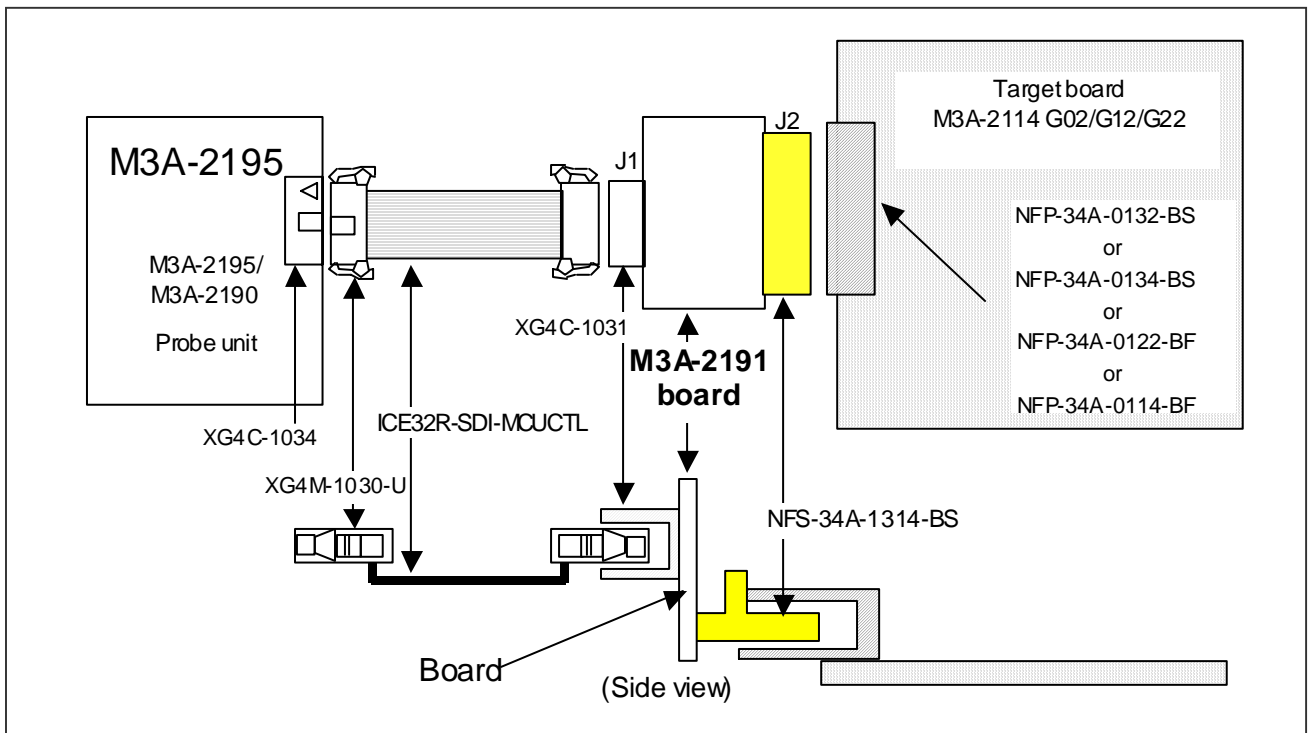

Figure2.1 Connection diagram for the M3A-2191

2.2 Detail Specifications

The M3A-2191 is designed to convert connector shapes and therefore consists of only a connector. Figure 2.2 shows pin numbers on each connector. Tables 2.2 through 2.4 list pin assignments of each connector.

Figure 2.2 Dimensional Outline Drawing and Pin Layout of the M3A-2191

Table 2.2 Relationship between J1 and J2 Connector Pins

J1		J2	
Pin name	Pin number	Pin number	Pin name
JTCLK	1	1	JTCLK
GND	2	2	GND
TDI	4	3	JTDO
VCCJ	9	4	VCC
TMS	5	5	JTMS
DBI	7	6	RVCC
RST	10	7	RESET
JTRST	6	8	JTRST
TDO	3	9	JTDI
FVCC	8	OPEN	

Table 2.3 Pin Assignments of J1 Connector

Pin number	Pin name	Function
1	TCLK	JTAG : Clock output
2	Vss	GND (0V)
3	TDO	JTAG : Data output
4	TDI	JTAG : Data input
5	TMS	JTAG : Control signal
6	TRST	JTAG : Reset signal
7	DBI	Interrupt request
8	NC	Idle pin
9	Vcc	Power supply (voltages specified for each type of microcomputer)
10	RST	Target microcomputer reset request

Table 2.4 Pin Assignments of J2 Connector

Pin number	Pin name	Function
1	TCLK	JTAG : Clock output
2	Vss	GND (0V)
3	TDI	JTAG : Data input↔ J1 :TDO
4	Vcc	Power supply (voltages specified for each type of microcomputer)
5	TMS	JTAG : Control signal
6	DBI	Interrupt request
7	RST	Target microcomputer reset request
8	TRST	JTAG : Reset signal
9	TDO	JTAG : Data output↔ J1 :TDI
10	Vss	GND (0V)
11	EVENT0	Event signal (0)
12	Vss	GND (0V)
13	EVENT1	Event signal (1)
14	Vss	GND (0V)
15	TRDATA(0)	Trace : Trace data (bit0)
16	TRDATA(1)	Trace : Trace data (bit1)
17	Vss	GND (0V)
18	TRDATA(2)	Trace : Trace data (bit2)
19	TRDATA(3)	Trace : Trace data (bit3)
20	Vss	GND (0V)
21	TRDATA(4)	Trace : Trace data (bit4)
22	TRDATA(5)	Trace : Trace data (bit5)
23	Vss	GND (0V)
24	TRDATA(6)	Trace : Trace data (bit6)
25	TRDATA(7)	Trace : Trace data (bit7)
26	Vss	GND (0V)
27	TRSYNC	Trace : Trace data synchronized signal
28	Vss	GND (0V)
29	TRCLK	Trace : Clock output
30	Vss	GND (0V)
31	NC	Idle pin
32	NC	Idle pin
33	NC	Idle pin
34	NC	Idle pin

3 Reference data

3.1 Connection Diagram and Part List

A connection diagram and a part list are provided in this and following pages for your reference.

Component Table

Renesas Solutions Corporation

Item number	Part name		Part specification			No. of pcs. per unit	Supplied by	Remarks
	Product name	Part number	Part type name	Manufacturer name	Mounting instruction			
1	Board		M3A-2191			1	Susei Electronics System	
2	Connector	J1	XG4C-1031	Omron	Attached backside	1		10pin straight angle
3	Connector	J2	XFFS-34A-1314	Yamaichi	Attached directly	1		34pin straight angle
