

Greeting Front Door

Greet door

When the doorknob is touched, a gentle light pattern will greet you as you return tired.

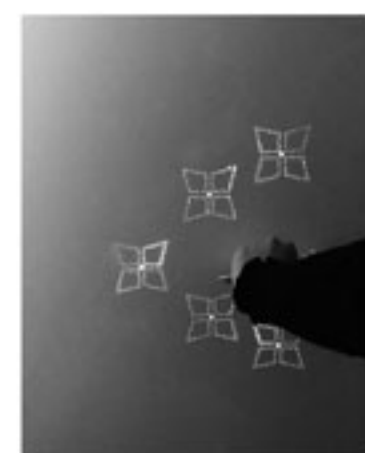

Living together with the home.
Each day is wonderful and enjoyable.

When a working woman living alone arrives home and this is what is waiting for her...
Hallway shines and lights up the darkness around her feet...
Starry sky spread out on the ceiling and wall...

With "Living in a living home" as the concept, we propose a whole new interior design style.
