PCN Type: Alternate Assembly Location

Data Sheet Change: N/A

Detail Of Change:

This change is to provide for additional capacity at ASE Taiwan (ASEK) on selected SOIC and TSSOP packages. ASEK is a qualified IDT Subcontractor.

The material set details of the current Assembly location of these packages is shown in the tables below. The die attach and mold compound used at ASEK are qualified IDT materials. There is no change from the existing qualified lead frame material, lead finish, and wire for this alternate assembly site.

IDT has devices being transferred that are currently qualified at the original assembly site using both Cu and Au for wire bonds. There will be no change in wire type as a result of this PCN. Customers ordering and receiving Au wire will continue to receive Au wire. Customers ordering and receiving Cu wire will continue to receive Cu wire.

Qualification was completed on 3 lots of each package type, using the worse case test vehicle and for each material set.
