

Device Overview

The 89HPES34H16 is a member of the IDT PRECISE™ family of PCI Express® switching solutions. The PES34H16 is a 34-lane, 16-port peripheral chip that performs PCI Express packet switching with a feature set optimized for high-performance applications such as servers, storage, and communications/networking. It provides connectivity and switching functions between a PCI Express upstream port and up to fifteen downstream ports and supports switching between downstream ports.

Utilizing standard PCI Express interconnect, the PES34H16 provides the most efficient I/O connectivity for applications requiring high throughput, low latency, and simple board layout with a minimum number of board layers. Each lane provides 2.5 Gbps of bandwidth in both directions and is fully compliant with PCI Express Base specification 1.1.

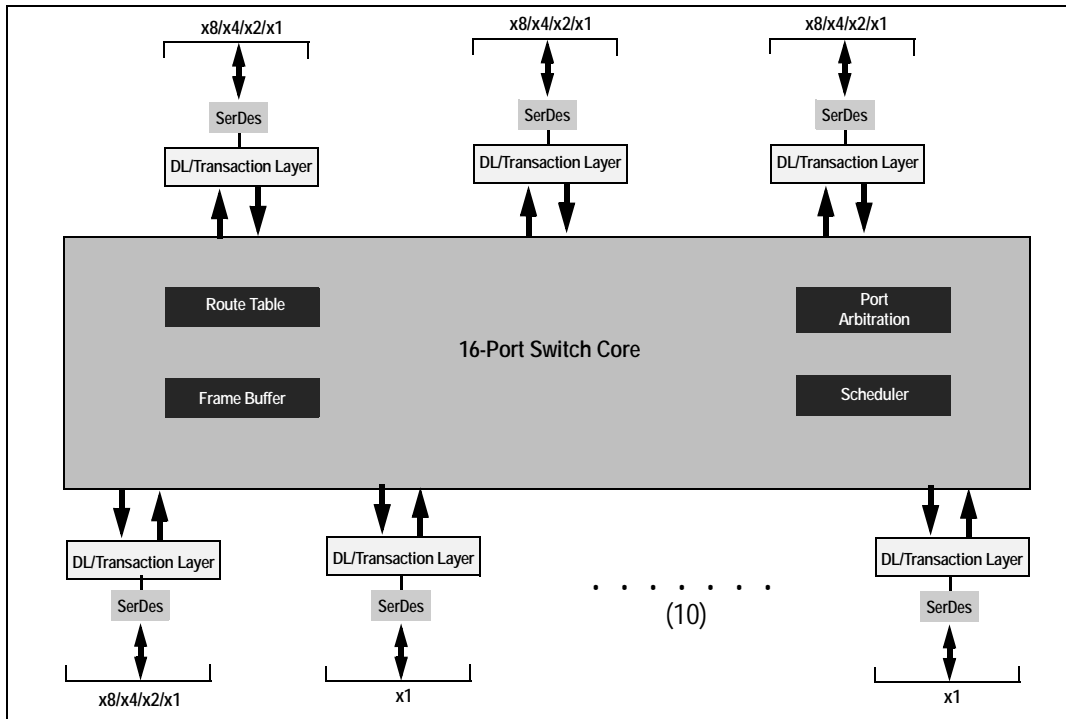

The PES34H16 is based on a flexible and efficient layered architecture. The PCI Express layer consists of SerDes, Physical, Data Link and Transaction layers. The PES34H16 can operate either as a store and forward switch or a cut-through switch and is designed to switch memory and I/O transactions. It supports eight Traffic Classes (TCs) and one Virtual Channel (VC) with sophisticated resource management to enable efficient switching and I/O connectivity.

Features

- ◆ **High Performance PCI Express Switch**
 - Sixteen maximum switch ports
 - Up to three x8 ports that bifurcate up to six x4 ports
 - Ten x1 ports
 - Thirty-four 2.5 Gbps embedded SerDes
 - Supports pre-emphasis and receive equalization on per-port basis
 - Low-latency cut-through switch architecture
 - Support for Max Payload Size up to 2048 bytes
 - Supports two virtual channels and eight traffic classes
 - PCI Express Base Specification Revision 1.1 compliant
- ◆ **Flexible Architecture with Numerous Configuration Options**
 - Port arbitration schemes utilizing round robin algorithms
 - Automatic per port link width negotiation from x8 to x4 to x2 or x1
 - Automatic lane reversal on all ports
 - Automatic polarity inversion on all lanes
 - Supports locked transactions, allowing use with legacy software
 - Ability to load device configuration from serial EEPROM
 - Ability to control device via SMBus

- ◆ **Highly Integrated Solution**
 - Requires no external components
 - Incorporates on-chip internal memory for packet buffering and queueing
 - Integrates thirty-four 2.5 Gbps embedded full duplex SerDes, 8B/10B encoder/decoder (no separate transceivers needed)
- ◆ **Reliability, Availability, and Serviceability (RAS) Features**
 - Redundant upstream port failover capability
 - Supports optional PCI Express end-to-end CRC checking
 - Internal end-to-end parity protection on all TLPs ensures data integrity even in systems that do not implement end-to-end CRC (ECRC)
 - Supports optional PCI Express Advanced Error Reporting
 - Supports PCI Express Hot-Plug
 - Compatible with Hot-Plug I/O expanders used on PC motherboards
 - Supports Hot-Swap
- ◆ **Power Management**
 - Supports PCI Power Management Interface specification, Revision 1.1 (PCI-PM)
 - Supports powerdown modes at the link level (L0, L0s, L1, L2/L3 Ready and L3) and at the device level (D0, D3_{hot})
 - Unused SerDes disabled
- ◆ **Testability and Debug Features**
 - Built in SerDes Pseudo-Random Bit Stream (PRBS) generator
 - Ability to read and write any internal register via the SMBus
 - Ability to bypass link training and force any link into any mode
 - Provides statistics and performance counters
- ◆ **Thirty-two General Purpose Input/Output pins**
 - Each pin may be individually configured as an input or output
 - Each pin may be individually configured as an interrupt input
 - Some pins have selectable alternate functions
- ◆ **Packaged in a 35mm x 35mm 1156-ball Flip Chip BGA with 1mm ball spacing**

Block Diagram

34 PCI Express Lanes
Up to 6 x4 ports and 10 x1 Ports
