NOTES:

1. (All leads) $\varnothing b$ applies between L_1 and L_2 . $\varnothing b_1$ applies between L_2 and 0.500 from the reference plane. Diameter is uncontrolled in L_1 and beyond 0.500 from the reference plane.
2. Measured from maximum diameter of the product.
3. α is the basic spacing from the centerline of the tab to terminal 1 looking at the bottom of the package.
4. N is the maximum number of terminal positions.
5. Controlling dimension: Millimeter.
