

Renesas Solution Starter Kit for RX23W

Release Note

1. Introduction

There are notes about the Board Support Package (BSP) included in the installer of “Renesas Solution Starter Kit for RX23W”.

2. Note

The BSP of the sample code attached to the installer uses v5.40. When executing code generation using the Smart Configurator, it is also recommended to upgrade the BSP.

Perform the procedure for upgrade to BSP in the next chapter.

3. Upgrade to BSP

Perform the following steps:

1. Double-click the “<project name>.scfg” file in the project explorer pane of e² studio to start Smart Configurator. After startup, select the components tab of Smart Configurator, select “r_bsp” from the component tree and then right-click on “r_bsp” and select “Change Version...”, as shown in Fig.1.

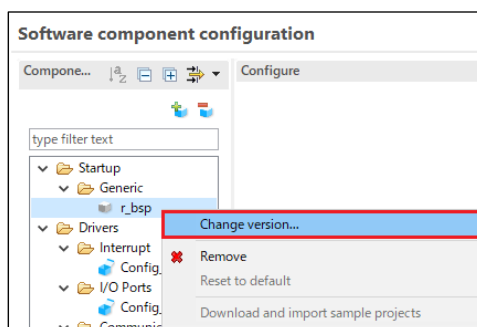

Fig.1 "Change Version" selection

2. Click the “Next” button on the “Version Selection” screen in Fig.2.

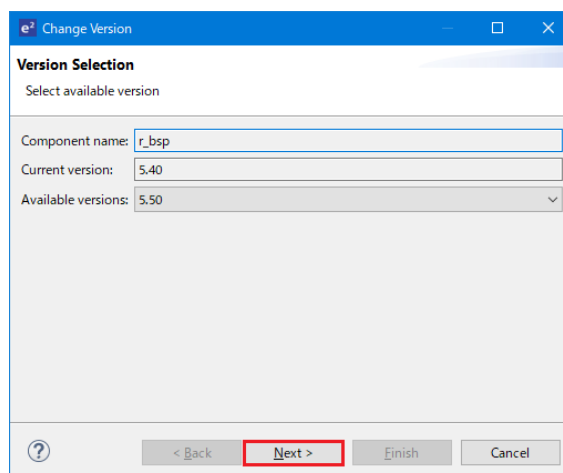

Fig.2 "Version Selection" screen (When upgrading to v5.50)

3. When you click the "Finish" button on the "Setting Overview" screen in Fig.3.

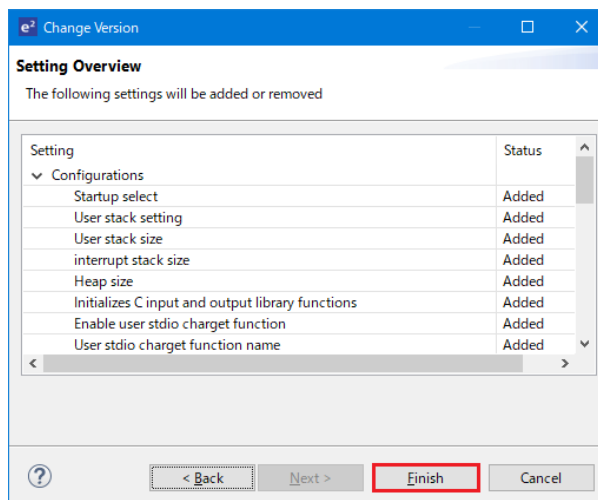

Fig.3. "Setting Overview" screen

4. The "Change Version" dialog in Fig.4 appears. Click the "Yes" button on the dialog to start code generation.

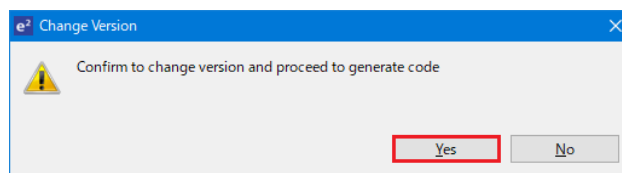

Fig.4. "Change Version" dialog

5. Completion of code generation can be confirmed in the console window as shown in Fig. 5.
