1. Affected product

Product	Outline	Control code ^{Note}
IE-780066-NS-EM4	Emulation board for μ PD780065 Subseries	A, B

It is not necessary to upgrade a control code B product.

2. Details of upgrade

The bugs described below will be corrected. After upgrading, the control code will be B.

- (1) Low-voltage emulation is not possible. Control code: A
- (2) The IE-780066-NS-EM4 may not start when connected to the target system in combination with the IE-78K0-NS(-A). Control code: A
- (3) The IE-780066-NS-EM4 may not start when not connected to the target system in combination with the IE-78001-R-A. Control code: A

3. Upgrade petition period

From October 1, 2001.

The upgrade described herein will be provided for free for a period of one year from the above date. After the free upgrade period expires, upgrade will be available for a fee. You are advised to take advantage of the free upgrade offer during the free upgrade period.

Note The "control code" is the second digit from the left in the 10-digit serial number in the warranty supplied with the in-circuit emulator you purchased (if it has not been upgraded). If the in-circuit emulator has been upgraded, a label indicating the new version is attached to the in-circuit emulator and the x in V-UP LEVEL x on this label indicates the control code.
