1. Affected product

Product	Outline	Control code ^{Note}
IE-780078-NS-EM1	Emulation board for μ PD780078, 780078Y Subseries	A, B, C

Note It is not necessary to upgrade a control code D product.

2. Details of upgrade

The bug described below will be corrected. After upgrading, the control code will be D.

(1) The key return interrupt request flag (KRIF) may be set illegally.

Control code: A, B, C

3. Upgrade petition period

From July 16, 2001.

The upgrade described herein will be provided for free for a period of one year from the above date. After the free upgrade period expires, upgrade will be available for a fee. You are advised to take advantage of the free upgrade offer during the free upgrade period.

The "control code" is the second digit from the left in the 10-digit serial number in the warranty supplied with the in-circuit emulator you purchased (if it has not been upgraded). If the in-circuit emulator has been upgraded, a label indicating the new version is attached to the in-circuit emulator and the x in V-UP LEVEL x on this label indicates the control code.
