

<p>CUSTOMER NOTIFICATION</p> <p>78K/0 Series Development Tool IE-780828-NS-EM4 Upgrade</p>	SBG-F-0061
	October 19, 2000
	<p>Toru Henmi, Department Manager 3rd System LSI Engineering Dept. Solution Engineering Div. NEC Electron Devices NEC Corporation</p>

CP(K), O

This is to inform you that the above product is to be upgraded.

1. Product types and version

Product	Outline	Control code
IE-780828-NS-EM4	Development tool for 78K0 Series	A

2. Details of upgrade

The bug described on the separate sheet has been corrected. After upgrading, the control code will be B.

3. Upgrade petition period

From November 01, 2000.

The upgrade described herein will be provided for free for a period of one year from the date of issue of this document. After the free upgrade period expires, upgrade will be available for a fee. You are advised to take advantage of the free upgrade offer during the free upgrade period.

Note The control code is the letter located in the second position from the left in the 10 digit serial code on the warranty that comes with this product when it is purchased (versions that have not been upgraded). For upgraded versions, an upgrade label is affixed to the product and the final letter of the label (i.e. the X in V-UP LEVEL X) indicates the control code.

1. Caution

The following bus will be corrected in IE-780828-NS-EM4 (control code: B and later).
We recommend you to upgrade to this product.

<Details of bug>

The operation of the meter controller driver may be unstable due to problems in the manufacturing process.

2. Product History

No.	Bugs and Changes/Additions to Specification	Control Code ^{Note}	
		A	B
1	The operation of the meter controller driver may be unstable due to problems in the manufacturing process.	√	—

√: Applicable, —: Not applicable

Note The “control code” is the second digit from the left in the 10-digit serial number in the warranty supplied with the in-circuit emulator you purchased (if it has not been upgraded). If the in-circuit emulator has been upgraded, a label indicating the new version is attached to the in-circuit emulator and the x in V-UP LEVEL x on this label indicates the control code
