

CUSTOMER NOTIFICATION IE-PC Driver (V2.10) Support for Windows 2000	SBG-T-2061
	June 6, 2000
	Yoichi Matsumoto, Senior Manager Microcomputer Engineering Department Solution Engineering Division NEC Electron Devices NEC Corporation

CP(K), O

This is to notify you that the IE-PC driver V2.10 included in the in-circuit emulator interface board package supports Windows 2000.

1. Affected products

<Products currently being shipped>

IE-70000-PCI-IF-A, IE-70000-CD-IF-A, IE-70000-PC-IF-C, IE-70000-98-IF-C

<Products no longer manufactured and kept for maintenance only>

IE-70000-PCI-IF, IE-70000-CD-IF, IE-70000-PC-IF-B, IE-70000-98-IF-B

2. Description of added specifications

- Upgrade of IE-PC driver included in the package of the IE-70000-PCI-IF-A and IE-70000-CD-IF-A

V1.00: Windows 95, Windows 98, and Windows NT 4.0 were supported.

V2.10: Windows 2000 is now supported (however, digital signature function is not supported)

V2.20: Windows 2000 digital signature function will be supported with V2.20, which will be released in August.

- IE-PC driver included in the package of the IE-70000-PC-IF-C and IE-70000-98-IF-C

V2.10: Windows 2000 is now supported (however, digital signature function is not supported)

V2.20: Windows 2000 digital signature function will be supported with V2.20, which will be released in August.

* No changes to interface board.

(only the driver has been modified to support Windows 2000.)

* Using the IE-PC driver V1.00 with Windows 95, Windows 98, or Windows NT 4.0 will cause no problems.

3. How to confirm the version of IE-PC driver

(1) Start Windows Explorer. Click to select the driver file installed under the following directory.

- When using Windows 95, Windows 98 : C:\Windows\System\Necpcif.vxd
- When using Windows NT 4.0 : C:\Winnt\System32\Drivers\Necpcif.sys

(2) Click File → Properties → Version → Comments on Explorer menu bar and check the version number shown in the About window.

- “V1.00” is displayed when using the V1.00 driver.
- “V2.10” is displayed when using the V2.10 driver.

4. How to obtain the driver (IE-PC driver V2.10)

It can be downloaded from NEC Microcomputer Engineering Division web site.

URL: <http://www.ic.nec.co.jp/micro/index.html>

Click “Download” → “Other Products (Driver, etc)” and download the driver.

If you need the driver to be supplied on a disk, contact:

Isao Kaneichi, Manager, Mizonokuchi Engineering Center

Naito Densetsu Machida Mfg. Co., Ltd

TEL: 044-822-3813 FAX: 044-822-3681

(Costs for the disk, copying, and postage will be charged.)

5. Others

* New products

IE-PC driver V2.10 is included in products shipped from June.

The part numbers of the products not supporting Windows 2000 are shown below for your reference. (xxxx indicates alphanumeric characters)
