Rev.1.01

Changes in Renesas C/C++ Compiler Package Formats

Jan.16, 2022

Outline

Renesas C/C++ Compiler Package no longer includes the installation medium (CD/DVD) from January 2022. It is offered as the common compiler package for the integrated development environments (CS+ and e²studio) and the orderable part numbers have been consolidated to reflect this change.

1. Details

We have reviewed the formats of Renesas C/C++ Compiler Packages so that customers would purchase the products easier. We have concluded that, from January 2022, we will offer the products in the single format: "Without the installation medium and with IDE". Other formats, "with the installation medium" and "without IDE", will be discontinued at the same time.

The orderable part numbers will stay the same as those of the current format of "without the installation medium and with IDE".

From January 2022, the compiler products "without the installation medium and with IDE" will include the license key certificate^(*) and installation guide (paper based), which are the same as the current "without the installation medium" format. Though the provision of the medium is ended, the installers of the IDE and compiler packages will continue to be available in the Renesas website to download.

^{*}1 For an annual license, the certificate for a license acquisition code will be provided.

2. Schedule

On January 20th, 2022, the products "with the installation medium" and "without IDE" will be discontinued.

3. Applicable Products

- (1) C Compiler Package for RH850 Family (CC-RH)
- (2) C/C++ Compiler Package for RX Family (CC-RX)
- (3) C Compiler Package for RL78 Family (CC-RL)
- (4) C Compiler Package for V850 Family (CA850, CX)
- (5) C Compiler Package for the RL78 and 78K Families (CA78K0R, CA78K0)

4. the orderable part numbers

When purchasing the compiler products, check the Part Number from the Product Lineup information on each compiler product website. This information will be updated on January 20th.
