Modifications to Conversion Adapter for E2 Emulator and
Release of Separately Available User Interface Cables and
Conversion Adapters

Outline

This document provides details about the modifications to the conversion adapter for the E2 emulator and the release of separately available user interface cables and conversion adapters.

1. Details

1.1 Modifications to the Conversion Adapter for the E2 Emulator

For better user convenience, the conversion adapter bundled with the E2 emulator has been upgraded from revision A to revision B. You can check the revision number with legend printing on the upper part of the conversion adapter (red boxes in the pictures below).

<Before modification>

Revision A

<After modification>

Revision B

➤ Modifications to the conversion adapter

- For easy target connection, the pin position of SW1 and switching information are clearly marked with legend printing.
- The new connector has a mechanism to prevent incorrect insertion.

These modifications do not change the characteristics of the adapter.

➤ About the E2 emulator

As a result of the modifications to the conversion adapter, the management number on the E2 emulator main unit has been changed from B to C.

You can check the management number on the back of the E2 emulator main unit.

<Before change>

Management number B

<After change>

Check either of the following locations.

Management number C

Management number C

1.2 Separately Available User Interface Cables and Conversion Adapters

The following two products bundled with the E2 emulator can now be purchased separately.

Available for purchase from April 20, 2018.

Product Name	Orderable Part Number(s)
User interface cable for E2 emulator	RTE0T00020KCAC0000J
Conversion adapter for E2 emulator	RTE0T00020KCA00000R
