Hardware Tools Released in April 2013

We released the hardware tools described below in this April.

1. For RH850/F1x Series in RH850 Family

RTE7701015DMB00000J: Debugging MCU board [MCU-debugging board] for the RH850/F1L group

This board, in combination with the E1 or E20 emulator, is used for debugging systems designed with any MCU of the RH850/F1L group encapsulated in 64-pin 0.5-mm-pitch LQFP (PLQP0064KB-A). It allows the MCUs of the group that do not have tracing function to perform it.

For details see its user's manual on the Web site at:
