

New MCU Groups Supported by Compact Emulator M38000T2-CPE

We have added new MCU groups to the line supported by the M38000T2-CPE compact emulator for the 740 family.

1. Description

The M38000T2-CPE newly supports the four MCU groups shown in the table below. The table also lists their respective emulator MCUs and MCU files.

MCU Group	Emulator MCU	MCU File
3850 (A spec)	M38507ARLSS *1	M38000.MCU *2
3822 (Std, M, H, and A versions)	M38227RFS *1	M38000.MCU *2
38C2 (A spec)	M38C29RLFS *1	M38000.MCU *2
38K0	M38K09RFS *1	M38000.MCU *2

NOTES:

*1. Optional

*2. Included with the M38000T2-CPE

To debug any MCU in the above MCU groups, you need not upgrade your current M38000T2-CPE but use the emulator MCU corresponding to the group concerned (optionally available).

For the guaranteed operational conditions of the M38000T2-CPE running with each emulator MCU, see datasheet.

2. Notices

If the version of the firmware file M38000A1.CO loaded in your product is earlier than

Ver.1.01.00, the emulator system may not operate properly or other problems may arise. In such a case, be sure to upgrade your firmware file to the latest one. For details of these problems and how to upgrade the firmware file, see RENESAS TOOL NEWS (RSO-M38000T2-CPE-031216D) "A Note on Using Compact Emulator M38000T2-CPE" issued on December 16, 2003.
