Embedded Target for RH850 Multicore + Multirate V5.05.00

Rev.1.00

Oct.05,2026

Outline

The Embedded Target for RH850 Multicore + Multirate has been revised from V5.02.00 to Embedded Target for RH850 Multicore + Multirate V5.05.00.

1. Products to Be Updated

Embedded Target for RH850 Multicore + Multirate V5.05.00

2. Description

The main changes are as follows.

2.1 Support for Using the Product Without a License

- Starting from this version, the product can be used even without a license installed. Although some functions are restricted when no license is installed, it can be used to run PIL simulations and verify connectivity with the development environment.

2.2 Added Device Support

- Support has been added for the following devices:
 - RH850/U2A
 - RH850/U2C

3. Using the Product Without a License

After downloading the product from the download list on the product page, you can start using it immediately without applying for a license.

4. Free Evaluation Edition

A commercial license or an evaluation license is required to access all product features. Before purchasing a commercial license, you can evaluate the product's functionality and performance using the free evaluation license, which provides full functionality for three months. After obtaining the evaluation edition from the download list in Product web page, please request the license key from your distributor or our sales representative.

5. Purchasing the Product

Contact your local Renesas Electronics sales office or distributor and inform them of the following product information.

For the price of the product, contact the sales office or distributor.

Product name	Part No.
Embedded Target for RH850 Multicore + Multirate	RTC00CST000000007J
