

[Upgrade to Revision] Renesas Flash Programmer V3.18.00

R20TS1105EJ0100
Rev.1.00
Jan. 20, 2025

Outline

Renesas Flash Programmer, a software tool for programming flash memory, has been updated from V3.17.00 to V3.18.00. For an overview of the product, refer to the link below.

<https://www.renesas.com/rfp>

1. Description

The following sections cover the main enhancements. For details, see the release note at the link below.

(The note is applicable as of January 20.)

<https://www.renesas.com/software-tool/renesas-flash-programmer-programming-gui#document>

1.1 New Feature

- Support for programming of external flash memory mounted on EK-RA8M1 and EK-RA8D1

Applies to: S28HL512T

The Renesas Flash Programmer now supports the erasure and programming of external memory above. To enable the operation of external flash memory, select [Enable external memory settings] on the [External Memory Settings] tabbed page of the GUI or use the -external-loader command in the rfp-cli. When opening a project created by a previous Renesas Flash Programmer product, external flash memory operations will not work. To resolve this problem, re-create a new project.

1.2 Improved Functionality and Change

- Changes to the order of programming areas via a serial interface

Applies to: RA2A1, RA2A2, RA2E1, RA2E2, RA2E3, RA2L1, RA4M1, RA4W1, RA6M1, RA6M2, RA6M3, RA6T1

The order of programming areas via a serial interface has now been changed as follows.

Before the change: Code Flash -> Config Area -> Data Flash

After the change: Code Flash -> Data Flash -> Config Area

2. Updating the Product

Download and install the latest Renesas Flash Programmer from the link below.

(V3.18.00 is available as of January 20.)
