Rev.1.00

Software for floating license management V2.08.00

Oct. 20, 2024

(for Windows)

Outline

Software for floating license management has been updated from V2.04.00 to V2.08.00 .

1. Products to Be Updated

Software for floating license management V1.00.00 to V2.04.00

2. Description

The main changes are as follows. Refer to the release note for details.

(The note is applicable as of October 22.)

<https://www.renesas.com/rl78-c-documentation>

<https://www.renesas.com/rx-c-documentation>

<https://www.renesas.com/rh850-c-documentation>

2.1 Support for multi-user environments

Floating licenses now support a multi-user environment where multiple users can log in to one PC and build. A floating license can be obtained for each username.

To use floating licenses in a multi-user environment, License Manager V2.08.00 (Windows and Linux version will be available from October 22.) is required.

2.2 Improvement to the operation in the saving of log files

Problems with the log files to be saved have been fixed.

2.3 Improvement to the operation of the function for saving the states of floating license usage

Fixed the problem that the number of licenses in use might differ from the actual situation when saving the usage status of floating licenses to a CSV file.

2.4 Improvement to the operation of the function for deleting multiple licenses

Fixed the problem that multiple licenses could not be deleted correctly at once.

3. Updating the Product

3.1 Downloading the Installer

Download the installer from the URL below. (The installer will be available from October 22.)

<https://www.renesas.com/rl78-c-download>

<https://www.renesas.com/rx-c-download>

<https://www.renesas.com/rh850-c-download>

License Manager V2.08.00 (Windows and Linux version will be available from October 22.) can also be downloaded from the above URL.
