Software for Floating License Management V2.09.00 (for Linux) Release Note

2.1 Updating the operating environment

The following operating system has been added to the supported operating systems:

Ubuntu 24.04 LTS Desktop (64-bit version)

In addition, the following operating system has been removed from the supported operating systems:

Ubuntu 20.04 LTS Desktop (64-bit version)

2.2 Changes to the floating license (offline mode)

The following features have been added to the offline mode of floating licenses to improve their operation:

- Added a function to display the current usage status of floating licenses on the license manager when obtaining a floating license in offline mode.

Note: This function requires the license manager V2.09.00 or later on the client PC.

3. Updating the Product
