Software for floating license management V2.09.00 (for Windows)

Rev.1.00

2025.10.20

Outline

Software for floating license management has been updated from V2.08.00 (for Windows) to V2.09.00 (for Windows).

1. Products to Be Updated

Software for floating license management V1.00.00 to V2.08.00 (for Windows)

2. Description

The main changes are as follows. Refer to the release note for details.

<https://www.renesas.com/rl78-c-documentation>

<https://www.renesas.com/rx-c-documentation>

<https://www.renesas.com/rh850-c-documentation>

2.1 Updating the operating environment

The software environment for the software for floating license management has been updated.

The following operating system has been added:

Windows Server 2025 (Server Core is unsupported)

The runtime library version has been updated to:

Microsoft .NET Framework 4.8

2.2 Changes to the floating license (offline mode)

The following features have been added to the offline mode of floating licenses to improve their operation:

- Added a function to display the current usage status of floating licenses on the license manager when obtaining a floating license in offline mode.

Note: This function requires the License Manager V2.09.00 or later on the client PC.

3. Updating the Product

3.1 Downloading the Installer

Download the installer from the URL below.
