Rev.1.00

Software for PG-FP5 Flash Memory Programmer

Apr. 16, 2019

Outline

We have updated the software for the PG-FP5 flash memory programmer.

For an overview of the PG-FP5, refer to the URL below.

<https://www.renesas.com/pg-fp5>

1. Software to Be Updated

The following software can be updated to the latest version.

Software to be updated		Latest version
Firmware	V2.16 or earlier	V2.17
Programming GUI	V2.15 or earlier	V2.17

For checking the version of each software, refer to the URL below.

https://www.renesas.com/pgfp5_ver

When updating the software listed above, use V4 of the FPGA data.

2. Description of the Update

2.1 Issues Fixed

The problem described in the following note has been fixed.

- RENESAS TOOL NEWS, Document No. R20TS0399EJ0100

1. Point for caution regarding enabling of the intelligent cryptographic unit slave E (ICUSE) of the RH850/C1M-A, RH850/F1K, RH850/F1KM-S1, RH850/P1L-C, and RH850/P1M-E groups

For details about this problem, refer to the following URL.

<https://www.renesas.com/search/keyword-search.html#genre=document&q=r20ts0399>

3. Updating Your Product

Online updating is available free of charge. Download the updating programs from the download page at the URL below. (The updating programs will be available on April 22.)

https://www.renesas.com/pg_fp5_download

For details of the updating method, refer to chapter 3 of the PG-FP5 User's Manual: Common.

<https://www.renesas.com/search/keyword-search.html#genre=document&q=r20out2922>

4. Additional Notes

The PG-FP5 has been discontinued as of the last order acceptance in May 2018. If you wish to purchase a new flash memory programmer, please consider the successor product, PG-FP6. For an overview of the product, refer to the URL below.

<https://www.renesas.com/pg-fp6>
