The Emulator Software for the E10A-USB Emulator HS0005KCU04H Revised to V.2.00 Release 00

We have revised the emulator software for the E10A-USB emulator HS0005KCU04H from V.1.00 Release 00 to V.2.00 Release 00. These emulator and emulator software are used to develop systems designed with multi-cored MCUs of the SuperH RISC engine family (SH2A-DUAL and SH4A-MULTI).
For details of the E10A-USB emulator HS0005KCU04H, go to:
  http://www.renesas.com/e10a_usb/hs0005kcu04h
The above URL is one of our global sites.

1. Product and Version to Be Updated
   The Emulator software for the E10A-USB emulator HS0005KCU04H
    V.1.00 Release 00

2. Description of Revision
2.1 Supported Devices Increased
   The following devices have been added to the support line:
    - All the devices of the SH7786 group, SH7780 series
    - The SH7776 (SH-Navi III) device

2.2 Windows Vista(R) Supported
   You can run the revised product on the 32-bit edition of Windows
   Vista(R) by using your user rights. However, its 64-bit edition is not
   supported.

3. How to Update Your Product
   Online update is available free of charge. To update yours, follow these
   steps:
   (1) Download the update program of the product, a .zip file, from:
        http://www.renesas.com/e10a_usb_download

This site will be opened from November 20.
The above URL is one of our global sites.
(2) Decompress the downloaded .zip file to obtain the installer program
and then execute it.

4. Notice

When you execute the installer program in the development system where
High-performance Embedded Workshop V.4.06.00 or earlier resides, it will
be updated to V.4.07.01.

If you do not want to update your High-performance Embedded Workshop
(that is, you want to preserve the existing High-performance Embedded
Workshop environment), install the E10A-USB Emulator Software V.2.00
Release 00 by executing the multi-installation function of the
installer.

For the outline of the multiple installation, go to:
 http://www.renesas.com/ide/install_manager
