Emulator Software for E10A-USB Emulators HS0005KCU01H and HS0005KCU02H Revised to V.3.05 Release 00

We have revised the emulator software for the E10A-USB emulators HS0005KCU01H and HS0005KCU02H from V.3.04 Release 01 to V.3.05 Release 00.

The emulator software, together with those emulators, is used to develop systems designed with MCUs of the SuperH RISC engine, H8S, and H8SX families

1. Product and Versions to Be Updated

Emulator Software for the E10A-USB emulators
HS0005KCU01H and HS0005KCU02H
V1.0.00 through V.3.04 Release 01

2. Description of Revision

The following MCUs have been added to the support line:

Device group	MCUs
SH-2A	SH72AW, SH72AY, SH72A0, SH72A2, SH726A, and SH726B
SH-4A	SH7766

3. Updating

Online update is available free of charge. To update yours, use either of the following methods.

(1) Use AutoUpdate Utility.

This service will be available on and after October 5, 2012.

(2) Follow these steps:

(a) Download the update program (a .zip file) of the revised product from the download site at:

https://www.renesas.com/e10a_usb_download

The update program will be published on this site on October 5.

The above URL is one of our global sites.

Two types of update program are available. The one consists of the update programs each of which is downloaded individually for the corresponding device group supported by the E10A-USB emulator concerned. The other, the full-package edition, consists of those that can be downloaded at a time for all the device groups. Use either of them as necessary.

(b) Decompress the downloaded .zip file to obtain the installer program and then execute it.

If you have downloaded the full-package edition of the update programs, you will obtain the HewInstMan.exe file, and if the other, setup1.exe, after decompression.

4. Notice

When the installer program, be it HewInstMan.exe or setup1.exe, is executed in a development system where High-performance Embedded Workshop V.4.09.00 or earlier resides, it will be updated to V.4.09.01.
