2.1 New Functions

The following functions have been added.

RZ/G1 package now supports the pin setting code generation function.

In addition to existing pin configuration, you can generate the device settings files (such as DTS*1 Include Files) corresponding to Linux BSP development environment.

- *1: Device Tree Specification (https://www.devicetree.org/specifications/)
- RZ/G1 package now supports the pin group setting.

Instead of assigning each pin, you can assign the pins in the same group at the same time.

For example, if SD0_DATA1 in SDHI0_DATA4 group is assigned, SD0_DATA2, and SD0_DATA3 are also assigned.

3. Updating Your Product

To install the program, download the installer from the URL below.
