RENESAS Tool News

Notes on Using Document Updaters

When you use document updaters, take note of the following problems:

- With updating downloaded documents
- With displaying documents published on the Web

1. Problem with Updating Downloaded Documents

1.1 Products and Versions Concerned

All the versions of the document updaters

1.2 Description

When a document that was already downloaded on your PC is updated on a Renesas Web page, information about this updating is displayed in the Downloaded documents requiring update tab of your document updater. However, for the documents that have been published or updated since July 2010, information about those is not displayed in the tab.

1.3 Workaround

To check to see the latest documents, go to the Renesas Web and click Documents in the left menu on each MPU/MCU page.

1.4 Schedule of Fixing the Problem

We plan to fix this problem in the next release of the products.

2. Problem with Displaying Documents Provided on Renesas Web Pages

2.1 Products and Versions Concerned

All the versions of the document updaters

2.2 Description

When you see a document published on a Renesas Web page by using your document updater, the document type, the revision step, the date of issue, and others may be displayed misaligned. And the dates of issue of the documents that have been published or updated since January 2010

are displayed as published or updated in 1910.

2.3 Workaround

To check to see the latest documents, go to the Renesas Web and click Documents in the left menu on each MPU/MCU page.
And if 1910 is displayed, read 2010 for it.

2.4 Schedule of Fixing the Problem

We plan to fix this problem in the next release of the products.
