## e<sup>2</sup> studio, the Eclipse open-source based Integrated Development Environment, revised to V3.0.1.07

We have revised the e<sup>2</sup> studio integrated development environment (IDE) from V3.0.0.22 to V3.0.1.07

For an overview of the product, see:  
<https://www.renesas.com/e2studio>

---

### 1. Descriptions of Revision

The following improvements have been made:

- (1) Support by the Code Generator for the RX64M group has been added.
- (2) A file saving function has been added to Device List View of the Code Generator for the RX111, RX110, and RX64M groups.

To save pin setting information to a file in CSV format, click on the icon at the upper left in the Device List View of the e<sup>2</sup> studio C/C++ perspective.

- (3) Code coverage support for RX64M group products has been added.

If you are using the E20 emulator, open an e<sup>2</sup> studio project for the RX64 group. You can view code coverage information in the Renesas Coverage view of the Debug perspective.

Open the Renesas Coverage view in the following way:

1. Open the Show View dialog box by selecting Other... below Show View from the Window menu.
2. In the Show View dialog box, select Renesas Coverage under Debug.

For details, select Help Contents from the Help menu of the e<sup>2</sup> studio.

Then select e<sup>2</sup> studio Coverage View in the help contents.

For other improvements, refer to the release notes for V3.0.1.07 of the e<sup>2</sup> studio at the following URL:

## 2. Updating Your Product

Online updating is available free of charge.

If the e<sup>2</sup> studio installed on your computer is V3.0.0.22, select Check for Updates from the Help menu of e<sup>2</sup> studio to automatically update your e<sup>2</sup> studio.

After the update, select About e<sup>2</sup> studio from the Help menu of e<sup>2</sup> studio to check that your e<sup>2</sup> studio has been updated to V3.0.1.07.

Note, however, that automatic updating to V3.0.0.22 and later versions is not possible from V2.2 and earlier versions. If you are using V2.2 or an earlier version, get the installer for V3.0.0.22 from the following URL and install V3.0.0.22 before updating it to V3.0.1.07.
