## Software Pieces for Flash Memory Programmer PG-FP5 Revised

We have revised the software pieces for the PG-FP5 flash memory programmer. For an overview of the PG-FP5, visit the Web site at:

[http://www.renesas.com/pg\\_fp5](http://www.renesas.com/pg_fp5)

The above URL is one of our global sites.

---

### 1. Software Pieces to Be Updated

You can update the following software pieces to their latest versions:

	Latest version
Firmware V2.06 and earlier	V2.07
Programming GUI V2.06 and earlier	V2.07

For how to check the version numbers of your products, see the PG-FP5 user's manual.

Note that the FPGA data has not been revised, so FPGA data V4 is valid.

### 2. Descriptions of Revision

#### 2.1 Device Support

The MCUs of the following families have been added to the support line:

- SuperH RISC engine family
- R8C family

For the names of all the supported MCUs, including the newly supported ones, see the PG-FP5 target device list in the Web site at:

[http://www.renesas.com/pg\\_fp5](http://www.renesas.com/pg_fp5)

This site will be opened on this December 26.

The above URL is one of our global sites.

Note that to program the flash ROMs of newly supported MCUs, you need to use their parameter files. For how to obtain them, see RENESAS TOOL NEWS Document No. 111226/tn5. You can see this item of news on the Web page at:

<http://tool-support.renesas.com/eng/toolnews/111226/tn5.htm>

This page will be opened on December 26.

## 2.2 Problem Fixed

The problem that no information about flash options can be obtained in the RL78 family of MCUs has been fixed.

Details of the problem:

If the Get Flash options command is executed in any MCU of the RL78 family in which security settings are effective, no information about flash options can be obtained with the error message saying "E1601 Protect error" displayed.

## 3. Updating Your Products

To update yours, use either of the following methods:

(1) Online update (free of charge)

Download each of the update programs of the software at:

[http://www.renesas.com/pg\\_fp5\\_download](http://www.renesas.com/pg_fp5_download)

Then execute it. They will be published on December 26. For details of how to update, see the PG-FP5 user's manual.

The above URL is one of our global sites

(2) Update by us (free of charge)

You can ask us to update yours. If you want, apply for it and send your PG-FP5 to your local Renesas Electronics marketing office or distributor.

Effective dates of application:

From January 10, 2012, to January 10, 2013, inclusive

NOTICE: An additional charge will be made after the effective dates expire.
