RENESAS Tool News

Applilet3 for RL78 Revised

We have revised the Applilet3 for RL78 from V1.04.00 to V1.05.00.

1. Descriptions of Revision

   (1) Device Support
      The following RL78 family MCUs have been added to the support line:

      In the RL78/G14 group:
         Products with equal to or greater than 384-KB ROM

   (2) Problems Fixed
      The following problems, of which we informed you in RENESAS TOOL NEWS
      Document No. 140416/tn8, have been fixed:
      - With selecting the 20-pin, 30-pin, or 32-pin package
        for the RL78/F13 or RL78/F14 group
      - With using the remote control carrier wave mask signal
        in the RL78/L12 group
      - With the case when ports that are not available
        in the MCU are displayed in the RL78/G14 group

      For details of these problems, see the following page:
      https://www.renesas.com/search/keyword-search.html#genre=document&q=140416tn8

2. Updating Your Product
   Download the installer of the product from the following URL:

      https://www.renesas.com/applilet_download
   The installer will be available on this site from August 5.
