

[Upgrade to Revision] Smart Configurator for RZ V2.2.0

R20TS1266EJ0100
Rev.1.00
Aug.20, 2026

Outline

Smart Configurator for RZ has been updated from V2.1.0 to V2.2.0.

1. Products to Be Updated

Smart Configurator for RZ V2.1.0 and earlier versions

2. Description

The main changes are as follows. Refer to the release note for details.

Smart Configurator for RZ V2.2.0 Release Note

2.1 Improved Functionality

The DDR Configuration features supports new devices in the RZ/G series scheduled for release in September 2026.

In addition, each feature has been improved as follows.

- Install Utility
 - Added configuration file import functionality
A new feature has been added that allows configuration files to be imported through both GUI and command-line interfaces. This eliminates the need to repeatedly enter complex settings each time the Install Utility is launched.
 - Added a menu for configuring the eMMC addresses used for saving and loading boot images
A configuration menu has been added to allow users to override the save and load addresses of bootloader images (BL2 and FIP) during download in both GUI-based and console-based flashing workflows. This enhancement provides greater flexibility when programming bootloader images.

Refer to the link of User's Guide below for details.
