

To our customers,

---

## Old Company Name in Catalogs and Other Documents

---

On April 1<sup>st</sup>, 2010, NEC Electronics Corporation merged with Renesas Technology Corporation, and Renesas Electronics Corporation took over all the business of both companies. Therefore, although the old company name remains in this document, it is a valid Renesas Electronics document. We appreciate your understanding.

Renesas Electronics website: <http://www.renesas.com>

April 1<sup>st</sup>, 2010  
Renesas Electronics Corporation

Issued by: Renesas Electronics Corporation (<http://www.renesas.com>)

Send any inquiries to <http://www.renesas.com/inquiry>.

## Notice

1. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
7. Renesas Electronics products are classified according to the following three quality grades: “Standard”, “High Quality”, and “Specific”. The recommended applications for each Renesas Electronics product depends on the product’s quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as “Specific” without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as “Specific” or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is “Standard” unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.
  - “Standard”: Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.
  - “High Quality”: Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.
  - “Specific”: Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.

(Note 1) “Renesas Electronics” as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.

(Note 2) “Renesas Electronics product(s)” means any product developed or manufactured by or for Renesas Electronics.

# M16C/62P, M16C/64 Group

## Differences between M16C/64 and M16C/62P

### 1. Abstract

This document is reference only and explains differences between M16C/64 group and M16C/62P group.

### 2. Introduction

The explanation of this issue is applied to the following condition

Applicable MCU - M16C/62P  
 - M16C/64

### 3. Points of the difference

#### 3.1 Function Differences

Figure 3.1.1 shows Function Differences

Figure 3.1.1 Function Differences (Note:1)

Item	M16C/62P	M16C/64
Shortest Instruction Execution time	41.7ns(f (BCLK)=24MHz, VCC1=3.0V to 5.5V) 100ns(f (BCLK)=10MHz, VCC1=2.7V to 5.5V)	40ns(f (BCLK)=25MHz, VCC1=2.7V to 5.5V)
I/O Port	I/O:87 (Nch.O.D:2), Input port: 1	I/O:88 (Nch.O.D:3)
Disablement function of key input interruption, INT6 and INT7 in A/D converter operation mode	None	Have
NMI	Enable after reset is canceled.	Disable after reset is canceled. Selectable valid mode with PM24 bit.
CNVss	-	After reset is deserted, internal pull-up is valid maximum two cycles in 125kHz on-chip oscillator in single-chip mode.
CLKOUT	Retain status when entering stop mode.	Output "high" when entering stop mode
Port P8_2 to P8_4(INT0 to 2)	Common to peripheral function and port input.	Divide peripheral function and port input. (Same configuration as INT3 to 7)
Handling of unused pins	Vref pin: Connect the pin to Vss	Vref pin: Connect the pin to Vcc1

Item	M16C/62P	M16C/64
External Bus	-	Usable area has been changed due to placing SFR area (0D000h-0D7FFh) and program 2ROM area and enhanced Data Flash area.
DMAC	2ch (25 sources)	4ch(43 sources)
Low-Voltage Detection Circuit	Vdet3 -	Vdet0 (The name is changed) When using low-voltage detection circuit, be sure to set PM25 bit "1: clock supply enabled". (PM25 bit: New additional bit.)
Cold Start-up/ Warm Start-up Flag	Vdet0: Unlinked	Vdet0: Linked
Frequency of the On-chip oscillator	About 1MHz	About 125kHz
CPU clock source after reset is canceled	Main Clock	125kHz On-chip Oscillator Clock
PLL	Multiplying factor : 2,4,6,8	Multiplying factor: 2,4,6,8 XIN: Through, 2 or 4 provides Before entering clock to PLL frequency synthesizer, be sure to divide clock from 2MHz to 5MHz.
	Multiplying factor modification; Only 1time after reset	Multiplying factor modification; Unlimited
SFR access wait (when CPU clock is over 16MHz)	2 wait	1 wait
Protection	-	New protect bit 6 protects PRG2C register. Protect bit 3 protects VWOC register.

Item	M16C/62P	M16C/64
A/D Converter	Operation Frequency: 3.3V: f AD=10MHz(±5LSB) 5.0V: f AD=12MHz(±3LSB)	Operation Frequency: 3.0V: f AD=10MHz (±3LSB) 3.3V: f AD=16MHz (±3LSB) 5.0V: f AD=25MHz(±3LSB)
	VrefCUT: Wait 1μS after connecting.	A/D Standby: Start in 1cycle after connecting.
	Selectable 10bit or 8bit conversion mode	Fixed 10bit conversion mode
	Selectable with/without sample and hold function	Fixed sample and hold function
	Available external Op-Amp connection mode	No external Op-Amp connection mode
	Can be used when operating with 2.0V≤Vref≤Vcc1	Be sure to use Vcc1, AVcc, Vref with same power supply
	ADST bit when using external trigger: After A/D conversion, ADST bit "1" is maintained.	ADST bit when using external trigger: After A/D conversion, ADST bit becomes "0".
	The operation after writing "1" in ADST bit: ADST bit set to "1" shortly.	The operation after writing "1" in ADST bit: After the passage of dummy time period, ADST bit is set to "1".
Timer A,B	Operation clocks: - From f1 to f32 in f1 clock - fc32	Operation clocks: -From f1 to f64 in f1 clock (One frequency circuit in timer A and B and Three-phase timer) - fc32 - On-Chip-Oscillator (125kHz)
	Fixed PWM output level	PWM output level can be inverted
	Select Up count or Down count: Selectable with TAJOUT pin (j=0 to 4)	Select Up count or Down count: Not selectable with TAJout pin (j=0 to 4)
	Timer Bi register in pulse measurement mode / Pulse period measurement mode: Disable to set the initial value (i=0 to 5)	Timer Bi register in pulse measurement mode / Pulse period measurement mode: Enable to set the initial value (i=0 to 5)
	Timer B over-flow flag: Disable to clear the flag while not counting.	Timer B overflow flag: Enable to clear the flag while not counting
	Timer A2 to A4 Tow-Phase Pulse Signal Processing Select bit in UP/Down flag register is write enable only.	Timer A2 to A4 Tow-Phase Pulse Signal Processing Select bit in UP/Down flag register is read and write enable.
Three-Phase Timer	Three-phase timer Output Cutoff: NMI pin	Three-phase timer Output Cutoff: SD pin

Item	M16C/62P	M16C/64
WDT	Common to start and refresh register	Reset register and Start register are divided. Optional function select address (OFS1) enables select and protect count source.
UART	UART3ch (UART 0 to 2)	UART6ch (UART 0 to 2,5 to 7)
	Operation Clock: From f1SIO to f32SIO in f1 clock	Operation Clock: From f1SIO to f32 SIO in f1 clock (Each URAT0 to 2,5 to 7 has one divider circuit)
SIO	Operation Clock: f1SIO, f2SIO, f8SIO, f32SIO	Operation Clock: f1SIO, f2SIO, f8SIO, f32SIO (One divider circuit belongs to SI/O3 and 4)
	SOUT Output: High impedance	SOUT Output: Selectable "High impedance" and "Last hold level" function.
Interrupt	32 vectors	64 vectors
	6 external interruption	8 external interruption (Add INT6,INT7)
	-	New interrupt source DMA2, DMA3, UART5, UART6, UART7, INT6, INT7

Item	M16C/62P	M16C/64
Flash ROM	Block:(256KB Version) - User Area: 4K+4K+8K+8K+8K+32K+64K+64K+64K - Boot ROM Area: 4K - Data Area: 4K	Block:(256KB Version) - Program 1 area: 64K+64K+64K+64K - Program 2 area: 16K - Data Flash: 4K+4K
	-	Flash distinction register (FIDR) is deleted
	-	User ROM area select bit (FMR05) is deleted
	-	New Data flash wait bit (FMR17) 1wait is required when connecting to data flash.
	Selectable protect option	Selectable protect option + WDT count source selection mode and count source protection mode
	-	Available Slow Read Mode
	-	Available Low-current Consumption mode
	-	Available User Boot Function
	-	Available Forced Erase Function
	-	Available Functions to prevent standard serial I/O mode
	-	Available Functions to prevent standard serial I/O mode
CPU Rewrite mode	Program command: 40h Unit: 1 word	Program command: 41h Unit: 2 word
	-	Setting procedure of EW0, EW1 mode has been changed.
	Available all unlock block erase command	No all unlock block erase command
Power Supply	Can be used when operating with $VCC1 \geq VCC2 \geq 2.7V$	Be sure to use VCC1 and VCC2 with same current source.  Note: Make sure to use Vref and AVCC with same current source, too.

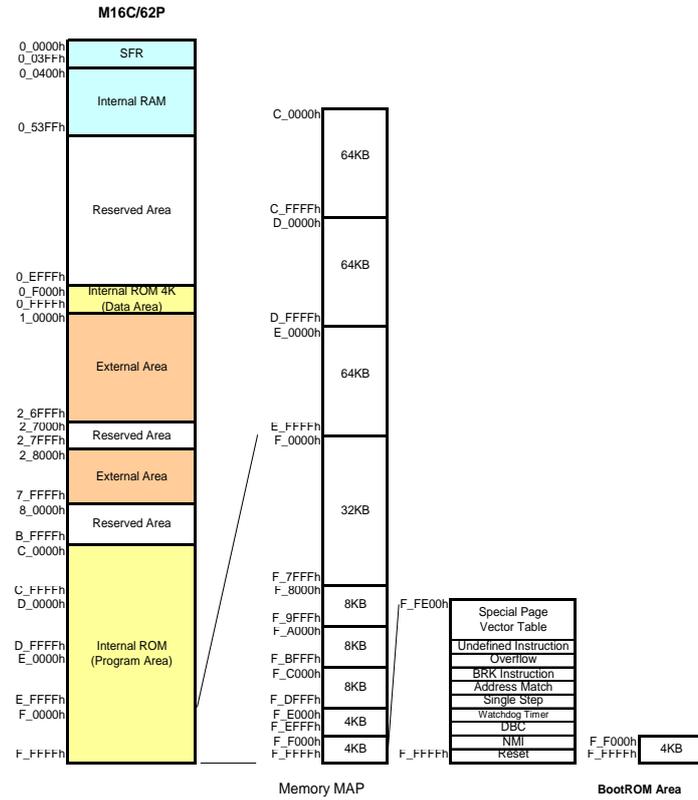

Item	M16C/62P	M16C/64
Consumption current	14mA (VCC1=5V, f(BCLK)=24MHz) 8mA (VCC1=3V, f(BCLK)=10MHz) 1.8μA (VCC1=3V, f(XCIN)=32kHz, Waite mode) 0.7μA (VCC1=3V, Stop mode)	20mA (VCC1=5V, f(BCLK)=25MHz) 5.7μA (VCC1=3V, f(XCIN)=32kHz, Waite mode) 3.0μA (VCC1=3V, Stop mode)
Parallel Writer	-	Adapter for M16C/64 is required

Note: Please refer to the hardware manual for more information of the details and the electrical characteristics.

## 3.2 Memory Map Comparison

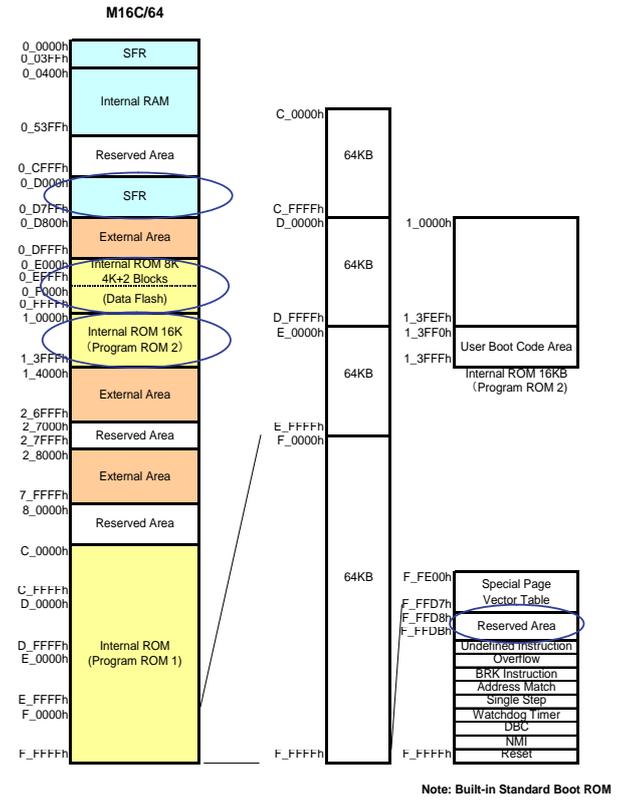

### 256K Version Memory Map

M16C/62P

M16C/64

Condition  
In memory expansion mode  
PM10 bit in PM1 register is "1" (Enable Data flash)  
PM13 bit in PM1 register is "1" (Enable all internal ROM, RAM)  
PRG2C0 in PRG2C register is "0" (Enable Program ROM2)

Note: Built-in Standard Boot ROM

### 3.3 Variable Vector Table Comparison

Software Interrupt #	Vector Address (1) Address(L) to Address(H)	M16C/62P	M16C/64
0	+0 to +3(0000h to 0003h)	Interrupt Source	Interrupt Source
1	+4 to +7(0004h to 0007h)	BRK Instruction	BRK Instruction
2	+8 to +11(0008h to 000Bh)	(Reserved)	(Reserved)
3	+12 to +15(000Ch to 000Fh)		INT7*
4	+16 to +19(0010h to 0013h)		INT6*
5	+20 to +23(0014h to 0017h)	INT3	INT3
6	+24 to +27(0018h to 001Bh)	Timer B5	Timer B5
7	+28 to +31(001Ch to 001Fh)	Timer B4, UART1 Bus Collision Detect	Timer B4, UART1 Bus Collision Detect
8	+32 to +35(0020h to 0023h)	Timer B3, UART0 Bus Collision Detect	Timer B3, UART0 Bus Collision Detect
9	+36 to +39(0024h to 0027h)	SI/O4,INT5	SI/O4,INT5
10	+40 to +43(0028h to 002Bh)	SI/O3,INT4	SI/O3,INT4
11	+44 to +47(002Ch to 002Fh)	UART2 Bus Collision Detect	UART2 Bus Collision Detect
12	+48 to +51(0030h to 0033h)	DMA0	DMA0
13	+52 to +55(0034h to 0037h)	DMA1	DMA1
14	+56 to +59(0038h to 003Bh)	Key Input Interrupt	Key Input Interrupt
15	+60 to +63(003Ch to 003Fh)	A/D	A/D
16	+64 to +67(0040h to 0043h)	UART2 Transmit,NACK2	UART2 Transmit,NACK2
17	+68 to +71(0044h to 0047h)	UART2 Receive,ACK2	UART2 Receive,ACK2
18	+72 to +75(0048h to 004Bh)	UART0 Transmit,NACK0	UART0 Transmit,NACK0
19	+76 to +79(004Ch to 004Fh)	UART0 Receive,ACK0	UART0 Receive,ACK0
20	+80 to +83(0050h to 0053h)	UART1Transmit,NACK1	UART1Transmit,NACK1
21	+84 to +87(0054h to 0057h)	UART1Receive,ACK1	UART1Receive,ACK1
22	+88 to +91(0058h to 005Bh)	Timer A0	TimerA0
23	+92 to +95(005Ch to 005Fh)	TimerA1	TimerA1
24	+96 to +99(0060h to 0063h)	TimerA2	TimerA2
25	+100 to +103(0064h to 0067h)	TimerA3	TimerA3
26	+104 to +107(0068h to 006Bh)	TimerA4	TimerA4
27	+108 to +111(006Ch to 006Fh)	TimerB0	TimerB0
28	+112 to +115(0070h to 0073h)	TimerB1	TimerB1
29	+116 to +119(0074h to 0077h)	TimerB2	TimerB2
30	+120 to +123(0078h to 007Bh)	INT0	INT0
31	+124 to +127(007Ch to 007Fh)	INT1	INT1
32	+128 to +131(0080h to 0083h)	(Reserved)	INT2
40	+160 to +163(00A0h to 00A3h)		INT Instruction Interrupt*
41	+164 to +167(00A4h to 00A7h)		DMA2*
42	+168 to +171(00A8h to 00ABh)		DMA3*
43	+172 to +175(00ACh to 00AFh)		UART5 Bus Collision Detect*
44	+176 to +179(00B0h to 00B3h)		UART5 Transmit,NACK5*
45	+180 to +183(00B4h to 00B7h)		UART5 Receive,ACK5*
46	+184 to +187(00B8h to 00BBh)		UART6 Bus Collision Detect*
47	+188 to +191(00BCh to 00BFh)		UART6 Transmit,NACK6*
48	+192 to +195(00C0h to 00C3h)		UART6 Receive,ACK6*
49	+196 to +199(00C4h to 00C7h)		UART7 Bus Collision Detect*
50	+200 to +203(00C8h to 00CBh)		UART7 Transmit,NACK7*
51	+204 to +207(00CCh to 00CFh)		UART7 Receive,ACK7*
52	+208 to +211(00D0h to 00D3h)		(Reserved)
53	+212 to +215(00D4h to 00D7h)		(Reserved)
54	+216 to +219(00D8h to 00DBh)		(Reserved)
55	+220 to +223(00DCh to 00DFh)		(Reserved)
56	+224 to +227(00E0h to 00E3h)		(Reserved)
57	+228 to +231(00E4h to 00E7h)		(Reserved)
58	+232 to +235(00E8h to 00EBh)		(Reserved)
59	+236 to +239(00ECh to 00EFh)		(Reserved)
60	+240 to +243(00F0h to 00F3h)		(Reserved)
61	+244 to +247(00F4h to 00F7h)		(Reserved)
62	+248 to +251(00F8h to 00FBh)		(Reserved)
63	+252 to +255(00FCh to 00FFh)		(Reserved)

Note:\*Changes

3.4 DMARequest Factor Comparison

M16C/62P DMA Request Factor Select Register

DMA0	DSEL3~DSEL0	DMS-0 (Basic Factor)	DMS-# (Extend Factor)
0000b		Falling edge of INT0 pin	---
0001b		Software Trigger	---
0010b		Timer A0	---
0011b		Timer A1	---
0100b		Timer A2	---
0101b		Timer A3	---
0110b		Timer A4	Both edge of INT0 pin
0111b		Timer B0	Timer B3
1000b		Timer B1	Timer B4
1001b		Timer B2	Timer B5
1010b		UART0 Transmit	---
1011b		UART0 Receive	---
1100b		UART2 Transmit	---
1101b		UART2 Receive	---
1110b		A/D	---
1111b		UART1 Transmit	---

There is compatibility with existing factor of M16C/62P.

M16C/64 DMA Request Factor Select Register

DMA0	DSEL4~DSEL0	DMS-0 (Basic Factor)	DMS-# (Extend Factor)
00000b		Falling edge of INT0 pin	---
00001b		Software Trigger	---
00010b		Timer A0	---
00011b		Timer A1	---
00100b		Timer A2	---
00101b		Timer A3	---
00110b		Timer A4	Bot hedge of INT0 pin
00111b		Timer B0	Timer B3
01000b		Timer B1	Timer B4
01001b		Timer B2	Timer B5
01010b		UART0 Transmit	---
01011b		UART0 Receive	---
01100b		UART2 Transmit	---
01101b		UART2 Receive	---
01110b		A/D	---
01111b		UART1 Transmit	---
10000b		UART1 Receive	Falling edge of INT4 pin
10001b		UART5 Transmit	Bot hedge of INT4 pin
10010b		UART5 Receive	-
10011b		UART6 Transmit	-
10100b		UART6 Receive	-
10101b		UART7 Transmit	-
10110b		UART7 Receive	-
10111b		-	-
11XXXb		-	-

X: "0" or "1" - : indicate no setting

DMA1	DSEL3~DSEL0	DMS-0 (Basic Factor)	DMS-# (Extend Factor)
0000b		Falling edge of INT1 pin	---
0001b		Software Trigger	---
0010b		Timer A0	---
0011b		Timer A1	---
0100b		Timer A2	---
0101b		Timer A3	SI/O3
0110b		Timer A4	SI/O4
0111b		Timer B0	Both edge of INT1 pin

**Notes regarding these materials**

1. This document is provided for reference purposes only so that Renesas customers may select the appropriate Renesas products for their use. Renesas neither makes warranties or representations with respect to the accuracy or completeness of the information contained in this document nor grants any license to any intellectual property rights or any other rights of Renesas or any third party with respect to the information in this document.
2. Renesas shall have no liability for damages or infringement of any intellectual property or other rights arising out of the use of any information in this document, including, but not limited to, product data, diagrams, charts, programs, algorithms, and application circuit examples.
3. You should not use the products or the technology described in this document for the purpose of military applications such as the development of weapons of mass destruction or for the purpose of any other military use. When exporting the products or technology described herein, you should follow the applicable export control laws and regulations, and procedures required by such laws and regulations.
4. All information included in this document such as product data, diagrams, charts, programs, algorithms, and application circuit examples, is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas products listed in this document, please confirm the latest product information with a Renesas sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas such as that disclosed through our website. (<http://www.renesas.com>)
5. Renesas has used reasonable care in compiling the information included in this document, but Renesas assumes no liability whatsoever for any damages incurred as a result of errors or omissions in the information included in this document.
6. When using or otherwise relying on the information in this document, you should evaluate the information in light of the total system before deciding about the applicability of such information to the intended application. Renesas makes no representations, warranties or guaranties regarding the suitability of its products for any particular application and specifically disclaims any liability arising out of the application and use of the information in this document or Renesas products.
7. With the exception of products specified by Renesas as suitable for automobile applications, Renesas products are not designed, manufactured or tested for applications or otherwise in systems the failure or malfunction of which may cause a direct threat to human life or create a risk of human injury or which require especially high quality and reliability such as safety systems, or equipment or systems for transportation and traffic, healthcare, combustion control, aerospace and aeronautics, nuclear power, or undersea communication transmission. If you are considering the use of our products for such purposes, please contact a Renesas sales office beforehand. Renesas shall have no liability for damages arising out of the uses set forth above.
8. Notwithstanding the preceding paragraph, you should not use Renesas products for the purposes listed below:
  - (1) artificial life support devices or systems
  - (2) surgical implantations
  - (3) healthcare intervention (e.g., excision, administration of medication, etc.)
  - (4) any other purposes that pose a direct threat to human life

Renesas shall have no liability for damages arising out of the uses set forth in the above and purchasers who elect to use Renesas products in any of the foregoing applications shall indemnify and hold harmless Renesas Technology Corp., its affiliated companies and their officers, directors, and employees against any and all damages arising out of such applications.
9. You should use the products described herein within the range specified by Renesas, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas shall have no liability for malfunctions or damages arising out of the use of Renesas products beyond such specified ranges.
10. Although Renesas endeavors to improve the quality and reliability of its products, IC products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Please be sure to implement safety measures to guard against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other applicable measures. Among others, since the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
11. In case Renesas products listed in this document are detached from the products to which the Renesas products are attached or affixed, the risk of accident such as swallowing by infants and small children is very high. You should implement safety measures so that Renesas products may not be easily detached from your products. Renesas shall have no liability for damages arising out of such detachment.
12. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written approval from Renesas.
13. Please contact a Renesas sales office if you have any questions regarding the information contained in this document, Renesas semiconductor products, or if you have any other inquiries.
